

EXECUTIVE SUMMARY
Status Report of Current Regulatory and Legal Proceedings
as of May 1, 2014

The following activity, as more fully described in the attached litigation report, has occurred since the report dated April 3, 2014 was circulated. New matters/proceedings since the last report are preceded by an asterisk '*'. Page numbers precede the matter description.

I. Complaints

- | | | | |
|---|---|--------------------|--|
| 1 | 206 Investigation: Consistency of ISO-NE (DA) Scheduling Practices with Natural Gas Scheduling Practices to be Adopted in Docket RM14-2 (EL14-23) | Apr 3-22
Apr 10 | Parties submit timely and out-of-time motions to intervene
Puget Sound submits comments |
|---|---|--------------------|--|

II. Rate, ICR, FCA, Cost Recovery Filings

- | | | | |
|-----|---|--|--|
| * 5 | Attachment F Implementation Rule Waiver Request (National Grid) (ER14-1686) | Apr 8 | National Grid requests limited waiver of Attachment F Implementation Rule |
| 4 | FCA8 Results Filing (ER14-1409) | Apr 14-15

Apr 25

Apr 27
Apr 29-30 | Joint Parties, EMCOS, CT AG, CMEEC/NHEC, State Advocates, Public Citizen, Inc., and UWUA Local 464 submit adverse comments/protests
Brayton Point responds to allegations made against it in this proceeding
Public Citizen responds to Brayton Point Apr 25 answer
NEPOOL, ISO, NEPGA/EPISA, and Dominion file answers |
| 6 | 2013/2014 Winter Reliability Program Bid Results Filing (ER13-2266) | Apr 8 | FERC denies TransCanada request for rehearing of Oct 7, 2013 order |

III. Market Rule and Information Policy Changes, Interpretations and Waiver Requests

- | | | | |
|-----|---|-------------------------------------|---|
| * 7 | NPRR Timing Changes (ER14-1693) | Apr 9
Apr 22-30 | ISO and NEPOOL jointly file changes
Dominion, NRG, NU intervene |
| * 7 | DR Baseline Net Supply Changes (ER14-1659) | Apr 4
Apr 16-25 | ISO and NEPOOL jointly file changes
Exelon, NRG, NU intervene |
| 7 | Demand Curve Changes (ER14-1639) | Apr 4-22

Apr 22

May 1 | ConEd, Champlain VT, Emera, Exelon, GDF Suez, Granite Ridge, IECG, LIPA, Maine PUC, Millennium, Nat'l Grid, NICC, NU, UI, and VT PSB intervene
NEPOOL submits supplemental comments; CPV, EMI, First Wind, MA AG, and NESCOE submit supporting comments; Brookfield, CT PURA/RI PUC, Dominion, Dynegy, EMCOS, Entergy/Exelon, MMWEC, NEPGA/EPISA, NextEra, NRG, PSEG, and TransCanada submit protests/adverse comments
ISO answers protests |
| 8 | Regulation Market Changes (ER14-1537) | Apr 9-10
Apr 10-11
Apr 23, 25 | Exelon, NU intervene
Beacon Power, ESA protest Regulation Market Changes
ISO, NEPOOL answer Beacon and ESA protests |
| 8 | FCA9 ORTPs for On-Shore Wind and DR with DG (ER14-1477) | Apr 4
Apr 18 | NextEra files protest
ISO answers NextEra and NEPGA protests |
| 9 | CSO Terminations: Constellation (ER14-1339) | Apr 16 | FERC accepts terminations |
| 9 | CSO Termination: NextEra (ER14-1338) | Apr 16 | FERC accepts termination |

9	CSO Terminations: Hess (ER14-1337)	Apr 16	FERC accepts terminations
9	CSO Termination: DCAM (ER14-1336)	Apr 16	FERC accepts termination
10	FCM Performance Incentives Jump Ball Filing (ER14-1050)	Apr 7	ClearVeiv Energy Partners submits comments
10	Demand Response Baseline Changes (ER14-727)	May 1	ISO submits compliance filing; comment date May 22
11	FCM Offer Review Trigger Price Revisions (ER14-616)	Apr 14	FERC issues tolling order affording it additional time to consider Renewable Parties' request rehearing of <i>ORTP Order</i>
12	Demand Resource Commercial Operation Auditing Revisions (ER14-581)	Apr 9	FERC accepts revisions, effective Jun 1, 2014
13	Energy Market Offer Flexibility Changes (ER13-1877)	Apr 29	FERC accepts Jan 17 compliance filing, effective Dec 3, 2014
14	Winter 2013/2014 Reliability Program (ER13-1851)	Apr 8	FERC denies rehearing of Sep 16 2014 <i>Winter Reliability Program Order</i>
14	ISO-NE Capacity Zones Proposal (ER12-953-004)	Apr 8 Apr 28	ISO requests expedited issuance of order on Capacity Zones Proposal FERC accepts Capacity Zones Proposal, effective Apr 28, 2014

IV. OATT Amendments / TOAs / Coordination Agreements

* 15	Updates to Attachment E (list of Local Networks) (ER14-1746)	Apr 21	PTO AC and ISO submit updates to OATT Attachment E; comment date May 12
16	<i>Order 764</i> Compliance Changes (ER14-375)	Apr 21	ISO and PTO AC submit compliance filing; comment date May 12

V. Financial Assurance/Billing Policy Amendments

* 18	FAP Conforming Changes (ER14-1727)	Apr 16	ISO files conforming corrections to FAP; comment date May 7
19	Revised Security Agreement (ER14-1448)	Apr 7 Apr 9	FERC conditionally accepts Security Agreement revisions, eff. Mar 7 ISO submits compliance filing
19	FTR Risk Management Policies-Related FAP Changes (ER14-1311)	Apr 9 Apr 15	FERC accepts changes Changes become effective

VI. Schedule 20/21/22/23 Changes

19	LGIA (Amended) – CMP/Warren (ER14-1473)	Apr 18	FERC accepts amended LGIA, effective Mar 13, 2014, as requested
19	Schedule 21-NEP: NEP/Ware Cogen IA Cancellation (ER14-1387)	Apr 7	FERC accepts notice of cancellation
19	Schedule 21-GMP: Merger Revisions; Cancellation of Schedule 21-CVPS (ER12-2304)	Apr 4	Chief Judge Wagner issues order terminating settlement judge procedures

VII. NEPOOL Agreement/Participants Agreement Amendments

No Activity to Report

VIII. Regional Reports

- * 20 LFTR Implementation: 22nd Quarterly Status Report (ER07-476) Apr 15 ISO files its 22nd quarterly report
- * 21 ISO-NE FERC Form 582 Apr 17 ISO submits annual report of total MWh of transmission service

IX. Membership Filings

- * 21 May 2014 Membership Filing (ER14-1834) May 1 **Membership:** Tyngsboro Spindle; **Terminations:** Comverge, Hardwood Companies; comment date May 22
- 21 March 2014 Membership Filing (ER14-1399) Apr 4 FERC accepts (i) the memberships of Enerwise Global Technologies and Pacific Summit Energy; (ii) the involuntary termination of A123 Systems Inc.; and (iii) the name changes of Kendall Green Energy LLC and Liberty Utilities (Granite State Electric) Corp.

X. Misc. - ERO Rules, Filings; Reliability Standards

- * 21 FFT Report: April 2014 (NP14-40) Apr 30 NERC files Report
- 22 Revised Reliability Standard: PER-005-2 (RD14-7) Apr 11 ISO-NE, CAISO, ERCOT, IESO, MISO, NYISO, SPP file joint comments
Apr 17 PJM files comments out-of-time
- 22 New Reliability Standard(s): Physical Security Measures (RD14-6) Apr 7 CA PUC intervenes out-of-time
Apr 11 Foundation for Resilient Societies submits comments
- 22 Revised Reliability Standards: MOD-032-1, MOD-033-1 (RD14-5) May 1 FERC approves Revised Standards
- 23 Revisions to BES Definition (RD14-2) Apr 23 AWEA requests reconsideration of the Mar 20 order approving the Revised BES Definition
- 24 NOPR: Revised Reliability Standards: PRC-023-003 and -025-001 (RM14-3; RM13-19) Apr 21 NERC files comments
Apr 28 EEI/EPSC file joint comments
- 24 NOPR: New Reliability Standard: EOP-010-1 (Geomagnetic Disturbance Operations) (RM14-1) Apr 7 Foundation for Resilient Societies submits comments
- 27 Order 791-A: Version 5 CIP Reliability Standards (-002 through -011) (RM13-5) Apr 29 NERC holed technical conference
Apr 30 FERC issues notice regarding post-tech conference comments; comment date May 21

XI. Misc. - of Regional Interest

- * 28 Study Agreement PSNH/Brookfield (ER14-1682) Apr 8 PSNH files executed Study Agreement with Brookfield to be compensated for costs incurred studying potential upgrades to the Coos Loop
- 28 NGrid Termination of Lowell Cogen IA (ER14-1593) Apr 23 FERC accepts termination of Lowell Cogen IA
- 28 MISO Methodology to Involuntarily Allocate Costs to Entities Outside Its Control Area (ER11-1844) Apr 7 MISO moves to lodge NYISO "Broader Regional Markets Informational Report" and Evaluation Report
Apr 22 FERC Staff, NYISO, NY TOs, PJM, and PSEG oppose motion to lodge

XII. Misc. - Administrative & Rulemaking Proceedings

- * 30 Reliability Technical Conference (AD14-9) Apr 16 FERC issues notice of Jun 10, 2014 Commissioner-led tech conference

- | | | | |
|----|---|------------------|--|
| 30 | RTO/ISO Winter 2013/14 Ops,
Market Performance (AD14-8) | Apr 11-
May 1 | Economic Engineers, NJ BPU, NY State Senator Parker, and City of
Martinsville submit comments |
| 30 | 3rd-Party Provision of Reactive
Supply and Voltage Control and
Regulation and Frequency
Response Services (AD14-7) | Apr 22 | FERC Staff issues report and holds workshop |

XIII. Natural Gas Proceedings 

- | | | | |
|----|--|-----------|-------------------|
| 34 | NOPR: Coord. of the Scheduling
Processes of Interstate Natural Gas
Pipelines and Public Utils (RM14-2) | Apr 11-30 | Parties intervene |
| 36 | Posting of Offers to Purchase
Capacity (Section 5 Proceeding)
(RP14-442) | Apr 3-30 | Parties intervene |

RE: Status Report on Current Regional Wholesale Power and Transmission Arrangements Pending Before the Regulators, Legislatures, and Courts

We have summarized below the status of key ongoing proceedings relating to NEPOOL matters before the Federal Energy Regulatory Commission (“FERC”), state regulatory commissions, and the Federal Courts and legislatures through May 1, 2014. If you have questions, please contact us.¹

I. Complaints

- **206 Investigation: Consistency of ISO-NE (DA) Scheduling Practices with Natural Gas Scheduling Practices to be Adopted in Docket RM14-2 (EL14-23)**

As previously reported, on March 20, 2014, the FERC initiated this proceeding, pursuant to section 206 of the Federal Power Act (“FPA”), to ensure that ISO-NE’s scheduling, particularly its Day-Ahead scheduling practices, correlate with any revisions to the natural gas scheduling practices to be ultimately adopted by the FERC in RM14-2 (*see* Section XIII below).² Noting its concern about the lack of synchronization between the day-ahead scheduling practices of interstate natural gas pipelines and electricity markets, the FERC directed each ISO and RTO, including ISO-NE, within 90 days after publication of a Final Rule in Docket RM14-2 in the *Federal Register*:

(1) to make a filing that proposes tariff changes to adjust the time at which the results of its day-ahead energy market and reliability unit commitment process (or equivalent) are posted to a time that is sufficiently in advance of the Timely and Evening Nomination Cycles, respectively, to allow gas-fired generators to procure natural gas supply and pipeline transportation capacity to serve their obligations, or (2) to show cause why such changes are not necessary. In their responses, each ISO and RTO must explain how its proposed scheduling modifications are sufficient for gas-fired generators to secure natural gas pipeline capacity prior to the Timely and Evening Nomination Cycles.³

The Commission expects to issue a final order in this section 206 proceeding within 90 days of the filings required under the March 20 order. Interventions by over 40 parties, including one by NEPOOL, were filed in the New England-specific docket. On April 10, Puget Sound submitted comments addressing the changing of RTO/ISO practices, including a request that RTO/ISOs be required “to adopt consistent timelines that require bids awards to be submitted prior to the natural gas timely and evening scheduling deadlines”. This matter is pending action in RM14-2. If you have any questions concerning this matter, please contact Dave Doot (860-275-0102; dtdoot@daypitney.com), Joe Fagan (202-218-3901; jfagan@daypitney.com), or Sebastian Lombardi (860-275-0663; slombardi@daypitney.com).

¹ Capitalized terms used but not defined in this filing are intended to have the meanings given to such terms in the Second Restated New England Power Pool Agreement (the “Second Restated NEPOOL Agreement”), the Participants Agreement, or the ISO New England Inc. Transmission, Markets and Services Tariff (the “ISO Tariff”).

² *Cal. Indep. Sys. Op. Corp. et al.*, 146 FERC ¶ 61,202 (Mar. 20, 2014). The New England 206 proceeding was docketed as EL14-23.

³ *Id.* at P 19.

- **FCM Administrative Pricing Rules Complaint (EL14-7)**

Rehearing and clarification has been requested and remains pending on both of the FERC's January 24 orders FCM Administrative Pricing-related orders that (i) granted in part, and denied in part, NEPGA's Administrative Pricing Rules Complaint in this proceeding,⁴ and (ii) accepted changes to the FCM Administrative Pricing Rules in ER14-463 (*see* Exigent Circumstances Filing – FCM Admin. Pricing Rules (ER14-463) below).⁵ As previously reported, in the *Jan 24 Orders*, the FERC found that the administrative pricing provisions for situations of Inadequate Supply and Insufficient Competition were unjust and unreasonable. While the FERC declined to adopt NEPGA's proposed revisions, it adopted the revisions proposed by the ISO in the Exigent Circumstances Filing (*see* ER14-463 below) and also declined to find the existing Capacity Carry Forward Rule unjust and unreasonable.⁶ NEPGA requested the FERC grant rehearing and clarification of the following three aspects of the *Jan 24 Orders*: (i) require prospective auctions to utilize ORTP-based prices; (ii) direct ISO-NE to implement a sloped demand curve for all aspects of the FCM, including for individual capacity zones, for FCA9; and (iii) require ISO-NE to eliminate the zero-bid requirement and implement the bidding protocols requested by NEPGA in its initial Complaint in this proceeding. On March 24, the FERC issued a tolling order affording it additional time to consider the rehearing requests, which remain pending before the FERC. If you have any questions concerning this matter, please contact Dave Doot (860-275-0102; dtdoot@daypitney.com) or Sebastian Lombardi (860-275-0663; slombardi@daypitney.com).

- **NESCOE FCM Renewables Exemption Complaint (EL13-34)**

Rehearing of the FERC's February 12, 2013 order denying NESCOE's FCM Renewable Exemption Complaint⁷ was requested and remains pending before the FERC. As previously reported, NESCOE instituted this December 28, 2012 complaint in response to the ISO's December 3, 2012 FCM compliance filing (*see* ER12-953 in Section III below) that implemented buyer-side mitigation without an exemption for state-sponsored public policy resources. NESCOE asserted that the ISO's proposed Minimum Offer Price Rule ("MOPR") would likely exclude from the FCM new renewable resources developed pursuant to state statutes and regulations, and thereby result in customers being forced to purchase more capacity than is necessary for resource adequacy and proposed an alternative renewables exemption (the "Renewables Exemption Proposal"). In denying the Complaint, the FERC found that "NESCOE has failed to meet its burden under section 206 to demonstrate that ISO-NE's MOPR is unjust, unreasonable or unduly discriminatory" as applied to the New England Capacity Market.⁸ The FERC declined to set the case for hearing, and therefore denied the motion to consolidate this proceeding with the FCA8 Revisions Compliance Filing proceeding (ER12-953),⁹ on which it concurrently issued an order conditionally accepting in part and dismissing in part the ISO's proposed compliance filing (*see* Section III below). Rehearing was requested by NESCOE, the CT PURA, and the MA DPU on March 14. On March 29, NEPGA filed an answer challenging NESCOE's request for rehearing. On April 15, the FERC issued a tolling order affording it additional time to consider the rehearing requests, which remain pending before the FERC. If you have any questions concerning this matter, please contact Sebastian Lombardi (860-275-0663; slombardi@daypitney.com), Harold Blinderman (860-275-0357; hblinderman@daypitney.com) or Dave Doot (860-275-0102; dtdoot@daypitney.com).

⁹ *Id.* at P 30.

- **Base ROE Complaint (2012) (EL13-33)**

This Complaint, as well as all of the answers and comments submitted in this proceeding, remain pending before the FERC. As previously reported, Environment Northeast (“ENE”), Greater Boston Real Estate Board, National Consumer Law Center, and the NEPOOL Industrial Customer Coalition (“NICC”, and together, the “2012 Complainants”) filed an additional complaint regarding the return on equity (“Base ROE”) used in calculating formula rates for transmission service in the ISO’s Open Access Transmission Tariff (“OATT”), seeking to reduce the Base ROE from the still effective 11.14% to 8.7%. 2012 Complainants acknowledged that the Base ROE is already the subject of ongoing hearing procedures in EL11-66 (see below) but offered the following six reasons for the docketing of a further complaint addressing the Base ROE: (1) the FERC has held that the pendency of a section 206 investigation into a public utility’s ROE does not immunize that ROE from investigation through a second section 206 complaint proceeding; (2) promoting the Congressionally-directed symmetry of remedies as between FPA §§ 205 and 206 (i.e. a fair symmetry requires that 2012 Complainants be free to file a complaint requesting further rate decreases based on later common equity cost data without regard to the status of prior complaints since TOs could file at any time for an increase); (3) this complaint would ensure the FERC could set an ROE below the 9.2% requested in EL11-66 if the evidence leads there; (4) to reset the New England Transmission Owners (“TOs”)¹⁰ zone of reasonableness through updated proxy group analysis; (5) greater assurance that their consent would be required to complete an ROE settlement; and (6) to establish a further 15-month refund period.

Interventions were filed by NEPOOL, AIM, CT AG, CT OCC, CT PURA, EMCOS,¹¹ MA AG, MOPA, MPUC, TEC, and the VT DPS. On January 16, the TOs filed their answer, asserting that the FERC should dismiss the Complaint as contrary to Section 206’s 15-month refund limitation and that the Complaint failed to show that the TOs’ Base ROE is unjust and unreasonable. TOs argue that evidence relevant to their cost of capital for 2013 and beyond will only be relevant to this Complaint. MMWEC and NHEC filed joint comments supporting the complaint and urging the FERC to grant the relief requested therein and establish the earliest possible refund effective date. Substantively, MMWEC/NHEC provided additional evidence to counter TO arguments that they face substantial payment “risks” in connection either with the provision of transmission service or the construction of new facilities. On January 31, 2013, 2012 Complainants answered the TOs January 16 answer. The request to consolidate this proceeding with EL11-66, as well as the complaint, answers, and comments are pending before the FERC. If you have any questions concerning this matter, please contact Joe Fagan (202-218-3901; jfagan@daypitney.com) or Eric Runge (617-345-4735; ekrunge@daypitney.com).

- **Base ROE Complaint (2011) (EL11-66)**

As previously reported, Trial Judge Cianci issued his initial decision on August 6, 2013 finding unjust and unreasonable the 11.14% ROE currently used in calculating formula rates for transmission service in the OATT, and finding that the ROE should be 10.6% for the October 2011 through December 2012 “locked in/refund period” and 9.7% from January 2013 forward, subject to further updating or modification by the FERC.¹² By way of reminder, the FERC established hearing and settlement judge procedures¹³ following a complaint by a number of State, consumer, and consumer advocate parties (the “2011 Complainants”)¹⁴

¹⁰ TOs are Bangor Hydro, CMP, National Grid, New Hampshire Transmission (“NHT”), NSTAR, NUSCO on behalf of its operating company affiliates CL&P, WMECO, and PSNH, UI, Unitil and Fitchburg, and Vermont Transco.

¹¹ EMCOS or the “Eastern Massachusetts Consumer-Owned Systems” are Braintree, Hingham, Reading, and Taunton.

¹² *Martha Coakley, Mass. Att’y Gen. et al.*, 144 FERC ¶ 61,012 (2013) (“2011 Base ROE Initial Decision”).

¹³ *Martha Coakley, Mass. Att’y Gen. et al.*, 139 FERC ¶ 61,090 (2012) (“Base ROE Complaint Order”). The *Base ROE Complaint Order* was not challenged and is final.

¹⁴ Complainants are Martha Coakley, Mass. Att’y Gen. (“MA AG”), the Conn. Public Utilities Regulatory Authority (“CT PURA”), Mass. Dep’t of Pub. Utils. (“MA DPU”), New Hampshire Pub. Utils. Comm. (“NH PUC”), George Jepsen, Conn. Att’y Gen. (“CT AG”), CT OCC, Maine Off. of the Pub. Advocate (“ME OPA”), New Hampshire

seeking a FERC order reducing the 11.14% Base ROE to 9.2% “due to changes in the capital markets since the *Bangor Hydro* proceeding.”¹⁵ After settlement judge procedures before Judge Judith A. Dowd were ultimately unsuccessful and terminated, these proceedings proceeded to now-completed hearings before Judge Cianci. Briefs on exceptions to the initial decision were filed by Complainants, TOs, EMCOS, and FERC Trial Staff on September 20. Briefs opposing exceptions were filed by the same parties on October 24, 2013.¹⁶ If you have any questions concerning this matter, please contact Joe Fagan (202-218-3901; jfagan@daypitney.com) or Eric Runge (617-345-4735; ekrunge@daypitney.com).

II. Rate, ICR, FCA, Cost Recovery Filings

- **FCA8 Results Filing (ER14-1409)**

On February 28, the ISO filed the results of the eighth FCA (“FCA8”) held February 3, 2014. The ISO reported: (i) that the Capacity Zones for FCA8 are Connecticut, Maine, NEMA/Boston and Rest of Pool; (ii) FCA7 commenced with a starting price of \$15.82/kW-mo. and concluded with a price of \$14.99/kW-month (reset to \$15.00/kW-mo.); (iii) FCA8 concluded with 33,702 MW of resources receiving CSOs to meet an ICR requirement of 33,855 MW (a 1,123 MW deficiency); (iv) administrative pricing rules set the prices for FCA8; (v) new resources that received a CSO in the Maine, Connecticut and Rest-of-Pool will be paid the \$15.00/kW-mo. Capacity Clearing Price; existing resources, the \$7.025/kW-mo. administrative price; (vi) both new and existing resources in NEMA/Boston (where the Carry Forward Rule was triggered) will be paid \$15.00/kW-mo.; and (vii) no de-list bids were rejected for reliability reasons. The ISO asked the FERC to accept the FCA8 rates and results, effective June 28, 2014. On March 25, 2014, the ISO supplemented the FCA8 Results filing to include a Groton Wind CSO (9.751 MW summer; 19.771 MW winter) in Attachment A.

Comments on this filing and the March 25 supplement thereto were due on or before April 14, 2014. Interventions were filed by NEPOOL, CLF, Dominion, EPSA, Exelon, HQUS, NEPGA, NESCOE, NRG, and PSEG.

The following seven protests/adverse comments were filed:

- ▶ **Joint Parties**¹⁷ (requesting, as a result of what they assert is a flaw in the current Import-Constrained Capacity Zone Capacity Clearing Price Floor administrative pricing rule that resulted in an anomalous and unforeseen result, a one-time waiver to adjust the FCA8 results so that the capacity price in NEMA/Boston for *existing* resources for the 8th capacity commitment period is set at \$10.00/kW-mo. (rather than \$15.00/kW-mo.); and an order directing a stakeholder process to consider any necessary changes to the Import-Constrained Capacity Zone Capacity Clearing Price Floor rule to prevent the potential for unjust and unreasonable results for any future auctions);
- ▶ **EMCOS**¹⁸ (requesting the FERC set aside the FCA8 results because those results are “affected by market manipulation, the unilateral exercise of market power, and the operation of a market process deficient in the fact that it failed to permit any supply response to the announcement of a permanent withdrawal of capacity from the Forward Capacity Market.” To the extent the FCA8 results are not

Off. of the Consumer Advocate, (“NH OCA”), Rhode Island Div. of Pub. Utils. and Carriers (“RI PUC”), Vermont Dep’t of Pub. Svc (“VT DPS”), MMWEC, AIM, TEC, Power Options, and the IECG.

¹⁵ See *Bangor Hydro-Elec. Co. et al.*, 117 FERC ¶ 61,129 (2006) (“*Opinion 489*”) at PP 79-81, *order on reh’g*, *Bangor Hydro-Elec. Co. et al.*, 122 FERC ¶ 61,265 (2008) at PP 30-34.

¹⁶ Errata to the Table of Authorities were filed by Complainants and the TOs on Oct. 25 and 29, respectively.

¹⁷ “Joint Parties” are National Grid, MA AG, MA DPU, the Northeast Utilities Companies (“NU”), and the United Illuminating Co. (“UI”).

¹⁸ In this proceeding, “Eastern Massachusetts Consumer-Owned Systems” or “EMCOS” are Belmont, Braintree, Concord, Georgetown, Groveland, Hingham, Littleton (MA), Merrimac, Middleton, Rowley, Taunton, and Wellesley.

set aside, EMCOS requested an evidentiary hearing and investigation addressing market manipulation and the exercise of market power and, like Joint Parties, requested a waiver of the Market Rule provisions that set the prices for capacity located in NEMA/Boston so that the FCA8 NEMA/Boston default price is re-set to no higher than \$10/kW-mo.)

- ▶ **CTAG** (urging the FERC to not accept the FCA8 Results Filing until it, through the Office of Enforcement (“OE”), has investigated whether the rates were “the result of abuse of market power and, therefore, unjust and unreasonable”);
- ▶ **CMEEC/NHEC** (requesting that the FERC, to the extent it accepts the FCA8 results, “initiate an expeditious investigation into whether the auction outcome is (1) reflective of legitimate and appropriate market actions undertaken in accordance with reasonable regional market rules or (2) the product of impermissible economic withholding”);
- ▶ **State Advocates**¹⁹ (noting concern, based on Synapse Energy Economics analysis, that Brayton Point retirement and withdrawal from FCA8 may have been an unlawful exercise of market power, requesting FERC, including Staff and OE, further review the FCA8 results and, if any exercise of market power is found to have occurred, directing the ISO to make Market Rule changes to prevent any such exercise of market power in future FCAs);
- ▶ **Public Citizen, Inc.**²⁰ (asserting that Energy Capital Partners “likely closed its Brayton Point generation units not because of environmental compliance problems or uneconomic operations, but rather to “earn more money by obtaining capacity auction payments at its 5 other New England-area power plants than if Brayton Point continued to operate”, urging the FERC to “nullify the results of the FCA8 auction and investigate Energy Capital Partners for violation of the Commission’s rules”, and, if ECP was indeed in violation of the Commission’s rules, demanding revocation of ECP’s market based rate authority); and
- ▶ **UWUA Local 464**²¹ (urging the FERC to reject the FCA8 results filing and direct an investigation by the Office of Enforcement, alleging ECP knowingly and uneconomically withheld Brayton Point from FCA8 in order to intentionally inflate market prices to benefit its other New England assets);

On April 25, Brayton Point responded to the allegations made against it by parties in this proceeding. On April 28, Public Citizen responded to Brayton Point’s answer. On April 29, answers to pleadings submitted were filed by NEPOOL, the ISO, Dominion, and NEPGA/EPISA. This matter is pending before the FERC. If you have any questions concerning this matter, please contact Sebastian Lombardi (860-275-0663; slombardi@daypitney.com) or Pat Gerity (860-275-0533; pmgerity@daypitney.com).

- **Attachment F Implementation Rule Waiver Request (National Grid) (ER14-1686)**

On April 8, 2014, National Grid, on behalf of New England Power (“NEP”), requested a limited waiver of the Attachment F Implementation Rule to (1) permit NEP to provide estimated data as the basis for calculating its calendar year 2013 Transmission Revenue Requirements for the annual update of the RNS and TOUT rates that will be submitted to the FERC on or before July 31, 2014 and (2) give NEP an additional 7 months (i.e. until February 28, 2015) to re-submit a corrected informational filing to the FERC with NEP’s Transmission Revenue Requirement updated such that it fully complies with the OATT’s requirement that 2013 FERC Form 1 data be used for calculating NEP’s Transmission Revenue Requirement for calendar year 2014. National Grid requested the limited because its 2013 FERC Form 1 will not be completed in time to be used as an input to the 2014 Annual Update (National Grid separately requested and was granted an extension

¹⁹ “State Advocates” are the New Hampshire Office of Consumer Advocate, Maine Office of the Public Advocate, and the Connecticut Office of Consumer Counsel.

²⁰ Public Citizen, Inc. is a national, nonpartisan consumer advocacy nonprofit organization based in Washington, DC. Public Citizen states that it represents the interests of “more than 350,000 members and supporters across the United States. Our members and supporters are households impacted by the actions of the owners of generation and power marketers in FERC-jurisdictional markets, and by the design and governance of FERC-jurisdictional markets”.

²¹ The Utility Workers Union of America Local 464 (“UWUA Local 464”) is a local labor organization located in Somerset, Massachusetts, whose approximately 140 members are employed at the Brayton Point Power Station.

to September 30, 2014 to file its FERC Form 1). No comments on this filing were submitted on or before the April 29, 2014 comment date and this matter is pending before the FERC. If you have any questions concerning this matter, please contact Eric Runge (617-345-4735; ekrunge@daypitney.com).

- **2013/2014 Winter Reliability Program Bid Results Filing (ER13-2266)**

On April 8, the FERC denied rehearing²² of its October 7 order conditionally accepting the list of Market Participants selected to provide demand response (“DR”) and oil inventory services in the 2013/2014 Winter Reliability Program and the prices to be paid.²³ TransCanada challenged the *Bid Results Order*²⁴ on November 6, 2013, asserting that the FERC should not have accepted the Bid Results because the FERC had not properly determined whether the Program itself was just and reasonable. The FERC disagreed with the arguments proffered by TransCanada and refused to consolidate the proceeding with the Winter 2013/14 Reliability Program proceeding. Unless the April 8 order is challenged in Federal Court, this matter will be concluded. If you have any questions concerning these matters, please contact Sebastian Lombardi (860-275-0663; slombardi@daypitney.com).

- **FCA1 Results Remand Proceeding (ER08-633)**

As previously reported, the DC Circuit issued on December 23, 2011, a *per curiam* order²⁵ that PSEG’s May 2010 petition for review be granted, remanding the FERC’s orders in this proceeding²⁶ for further consideration, which remains to be acted on. In particular, the FERC must (i) determine whether PSEG’s position (that it should receive the full (unprorated) floor price for all its resources that it could not prorate) would be an appropriate way to interpret the then-existing Market Rules and, if not, (ii) respond to PSEG’s objections that any contrary result would result in “undue discrimination” and would be “inconsistent with the fundamental policy goals” of FCM. On October 15, 2012, PSEG filed a motion requesting that the FERC issue an order on remand directing the ISO to pay PSEG the full FCA floor price without further delay (for PSEG, the difference totaling \$2.8 million plus interest). The ISO filed on October 31, 2012 an answer to PSEG’s October 15 motion. On November 1, 2012, Connecticut Generators²⁷ submitted comments supporting PSEG’s request and a few of the Connecticut Generators moved to intervene out-of-time. As noted, this matter remains pending before the FERC.

- **ISO Securities: Authorization for Future Drawdowns (ES14-31)**

On March 31, the ISO requested the necessary continued FERC authorization for drawdowns under its previously authorized \$20 million Revolving Credit Line and \$4 million line of credit supporting the Payment Default Shortfall Fund.²⁸ (ISO authorization under the 2012 Order otherwise terminates on June 30,

²² *ISO New England Inc.*, 147 FERC ¶ 61,027 (Apr. 8, 2014).

²³ *ISO New England Inc.*, 145 FERC ¶ 61,023 (Oct. 7, 2013) (“*Bid Results Order*”), *reh’g denied*, 147 FERC ¶ 61,027 (Apr. 8, 2014).

²⁴ TransCanada asserts that the FERC erred in: (1) failing to determine whether the costs and resulting bid prices are just and reasonable; (2) accepting the bidding results because the ISO failed to comply with its Tariff criteria; and (3) rejecting arguments re: the “excessive disparity” between the Analysis Group’s estimated cost range and the actual price of the program.

2014). No comments on this filing were submitted on or before the April 21 comment date and this request is pending before the FERC. If you have any questions concerning this matter, please contact Paul Belval (860-275-0381; pnbelval@daypitney.com).

III. Market Rule and Information Policy Changes, Interpretations and Waiver Requests

- **NPRR Timing Changes (ER14-1693)**

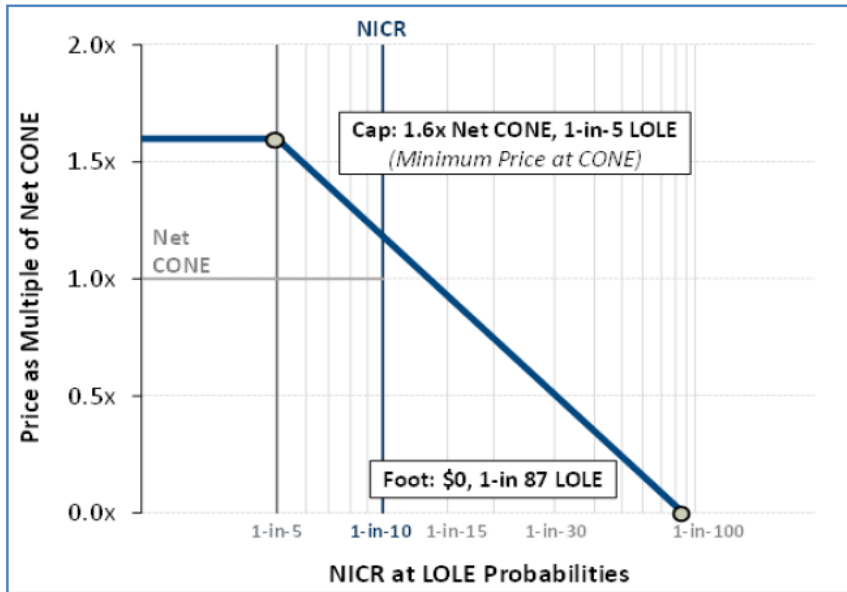

On April 9, the ISO and NEPOOL jointly filed changes to Market Rule 1 to change the timeframe for notifying the ISO that a resource will be retired to no later than 15 days prior to the commencement of the relevant FCA so that it is known at the time of the FCA whether a resource that has submitted a Non-Price Retirement Request (“NPRR”) and is needed for some period for reliability will in fact remain in service for the relevant Capacity Commitment Period (“NPRR Timing Changes”). A June 9, 2014 effective date was requested. The changes were supported by the Participants Committee by way of the April 4, 2014 Consent Agenda. Doc-less interventions were filed by Dominion, NRG, and NU. No substantive comments on this filing were submitted on or before the April 30 comment date, and this matter is pending before the FERC. If you have any questions concerning this matter, please contact Sebastian Lombardi (860-275-0663; slombardi@daypitney.com).

- **DR Baseline Net Supply Changes (ER14-1659)**

On April 4, the ISO and NEPOOL jointly filed changes to Market Rule 1 to prevent the possibility of a systematic over-estimation of Demand Response Baselines for demand response assets (Real-Time Demand Response Assets and Real-Time Emergency Generation Assets) that are capable of producing net supply (the “DR Baseline Net Supply Changes”). A June 1, 2014 effective date was requested. The changes were supported by the Participants Committee by way of the April 4, 2014 Consent Agenda. Doc-less interventions were filed by Exelon, NRG, and NU. No substantive comments on this filing were submitted on or before the April 25 comment date, and this matter is pending before the FERC. If you have any questions concerning this matter, please contact Sebastian Lombardi (860-275-0663; slombardi@daypitney.com).

- **Demand Curve Changes (ER14-1639)**

On April 1, the ISO and NEPOOL jointly submitted revisions to the FCM rules to establish a system-wide sloped demand curve (“Demand Curve Changes”). The Demand Curve Changes define the shape of the system-wide sloped demand curve (with key points defined by CONE and the 0.1 days/year LOLE target) illustrated below, extend the period during which a Market Participant may “lock-in” the capacity price for a new resource from five to seven years, establish a limited renewables, and eliminate, at the system-wide level, the administrative pricing rules that were necessary in certain market conditions under the vertical demand curve construct.

A June 1, 2014 effective date, for implementation prior to associated FCA9 deadlines, was requested. The Demand Curve Changes were supported by the Participants Committee at its March 21, 2014 meeting.

Comments on this filing were due on or before April 22, 2014. Doc-less interventions were filed by ConEd, Champlain VT, Emera, Exelon, GDF Suez, Granite Ridge, IECG, LIPA, Maine PUC, Millennium, Nat'l Grid, NEPOOL Industrial Customer Coalition ("NICC"), NU, UI, and VT PSB. Comments supporting the Demand Curve

Changes were filed by: CPV, EMI, First Wind, MA AG, and NESCOE; protests/adverse comments were filed by Brookfield, CT PURA/RI PUC, Dominion, Dynegy, EMCOS, Entergy/Exelon, MMWEC, NEPGA/EPSCA, NextEra, NRG, PSEG, and TransCanada. NEPOOL supplemented its comments on April 22. On May 1, the ISO answered the protests submitted. If you have any questions concerning this matter, please contact Sebastian Lombardi (860-275-0663; slombardi@daypitney.com).

- **Regulation Market Changes (ER14-1537)**

As previously reported, the ISO and NEPOOL jointly submitted, on March 20, revisions to the new Regulation Market, including a new May 21, 2014 effective date²⁹ for that market ("Regulation Market Changes"). The Regulation Market Changes (i) change the Automatic Generation Control ("AGC") dispatch method such that all resources will be dispatched using the same dispatch method; (ii) clarify the rules concerning how Alternative Technology Regulation Resources ("ATRRs") that do not participate directly in the energy market may be registered as combinations of various asset types to provide for appropriate settlement of energy injections or withdrawals related to providing regulation; (iii) defer the 1 MW minimum size requirement for ATRRs that were active participants in the Alternative Technology Regulation Pilot Program until October 1, 2014; and (iv) eliminate ambiguities and correct errors in the Regulation Market rules and tariff language. The Regulation Market changes were supported by the Participants Committee at the March 7, 2014 meeting. Comments on this filing were due on or before April 10, 2014. Doc-less interventions were filed by Exelon, NRG and NU. Protests were filed by Beacon Power and the Electricity Storage Association ("ESA"). The ISO and NEPOOL answered the Beacon and ESA protests on April 23 and 25, respectively. This matter is currently pending before the FERC. If you have any questions concerning this matter, please contact Sebastian Lombardi (860-275-0663; slombardi@daypitney.com).

- **FCA9 ORTP Rules for On-Shore Wind and DR with DG (ER14-1477)**

On March 13, the ISO and NEPOOL jointly submitted revisions to recalculate, for FCA9, the ORTP for on-shore wind resources (\$10.32/kW-mo. after removing the Production Tax Credit ("PTC")) and Demand Resources ("DR") with Distributed Generation ("DG") (for DR with new DG, an ORTP value based on the ORTP of a newly installed generator of the same technology type; for DR with previously installed DG, \$1.145/kW-mo. -- the ORTP value for Load Management) ("ORTP Revisions"). The ORTP Revisions also add a provision that requires the IMM to consider any reinstatement of the PTC when the IMM performs an annual update of the

²⁹ The Regulation Market were planned to become effective Oct. 1, 2014. The Regulation Market Changes would support the earlier, accelerated effective date of May 21, 2014.

ORTP value for on-shore wind resources. A May 13, 2014 effective date was requested. These ORTP Revisions were supported by the Participants Committee at the March 7, 2014 meeting. Comments on this filing were due on or before April 3, 2014. Doc-less interventions were filed by First Wind, NRG and NU; NEPGA and NextEra submitted limited protests (opposing the requirement that the IMM decrease the ORTP for on-shore wind resources without stakeholder deliberation of the propriety and accuracy of the IMM's changes to the ORTP should the Production Tax Credit be reinstated). On April 18, the ISO answered the NEPGA and NextEra protests. This matter is pending before the FERC. If you have any questions concerning this matter, please contact Sebastian Lombardi (860-275-0663; slombardi@daypitney.com).

- **CSO Terminations: Constellation (ER14-1339)**

On April 16, the FERC accepted the ISO's February 19 request to terminate certain CSOs held by Project Sponsor Constellation New Energy ("Constellation"). As indicated, the ISO will draw down the amount of financial assurance provided by Constellation with respect to the CSOs. Unless the April 16 order is challenged, this proceeding will be concluded. If you have any questions concerning this matter, please contact Pat Gerity (860-275-0533; pmgerity@daypitney.com).

- **CSO Terminations: NextEra (ER14-1338)**

On April 16, the FERC accepted the ISO's February 19 request to terminate a CSO for Resource No. 367 held by Project Sponsor NextEra Energy Power Marketing ("NextEra"). As indicated, the ISO will draw down the amount of financial assurance provided by NextEra with respect to the CSO. Unless the April 16 order is challenged, this proceeding will be concluded. If you have any questions concerning this matter, please contact Pat Gerity (860-275-0533; pmgerity@daypitney.com).

- **CSO Terminations: Hess (ER14-1337)**

On April 16, the FERC accepted the ISO's February 19 request to terminate certain CSOs held by Project Sponsor Hess Energy Marketing ("Hess"). As indicated, the ISO will draw down the amount of financial assurance provided by Hess with respect to the CSOs. Unless the April 16 order is challenged, this proceeding will be concluded. If you have any questions concerning this matter, please contact Pat Gerity (860-275-0533; pmgerity@daypitney.com).

- **CSO Terminations: DCAM (ER14-1336)**

On April 16, the FERC accepted the ISO's February 19 request to terminate a CSO for Resource No. 15543 held by Project Sponsor Massachusetts Division of Capital Asset Management ("DCAM"). As indicated, the ISO will draw down the amount of financial assurance provided by DCAM with respect to the CSO. Unless the April 16 order is challenged, this proceeding will be concluded. If you have any questions concerning this matter, please contact Pat Gerity (860-275-0533; pmgerity@daypitney.com).

- **NCPC Payment Re-Design and Conforming Mitigation Changes (ER14-1147)**

On January 24, the ISO and NEPOOL jointly submitted revisions to Appendices A & F to Market Rule 1 and to the unified Definitions Section of the Tariff (the "NCPC Credit Revisions") to redesign the NCPC credit rules and to make conforming changes to the market mitigation provisions of Appendix A. Specifically, the NCPC Credit Changes were revised to account for the Energy Offer Flexibility Changes (*see* ER13-1877 below) and to unify the NCPC credit rules under an enhanced design principle. A December 3, 2014 effective date, for implementation with the Offer Flexibility Changes, was requested. The NCPC Credit Revisions were supported by the Participants Committee at the November 8, 2013 meeting. Comments on this filing were due on or before February 14, 2014. Doc-less interventions were filed by Brookfield, Dominion and NU; no comments were submitted. This matter is currently pending before the FERC. If you have any questions concerning this matter, please contact Sebastian Lombardi (860-275-0663; slombardi@daypitney.com).

- **FCM Performance Incentives Jump Ball Filing (ER14-1050)**

On January 17, the ISO and NEPOOL submitted two alternative versions of Market Rule changes intended to improve the operating performance of capacity resources in New England -- the "ISO-NE Proposal" and the "NEPOOL Proposal".

Both Proposals seek to further address existing reliability, investment and resource performance challenges in New England. However, the two proposals offer fundamentally different approaches. The ISO-NE Proposal would redefine capacity as a different product where payments are affected by whether a resource is providing energy and/or operating reserves in Real-Time three years hence. Through its "pay-for-performance" mechanism, the ISO Proposal abandons longstanding capacity market principles in New England and the other RTO markets and converts the FCM from a market designed to ensure long-term resource adequacy to one that is driven primarily by prospective and largely unpredictable actual production. Resources not producing energy or reserves at the time of a "Capacity Scarcity Condition" for any reason would be subject to significant penalties, even if that scarcity condition occurs during very low load conditions, or is caused by transmission outages or even by errors in the ISO's load forecasting. The NEPOOL Proposal, in contrast, builds upon a series of Market Rule changes, either made or are pending, proposes changes that would enhance the current market design and achieves the objective of improving the performance incentives for resources in the ISO-NE electricity markets. The Proposals were submitted pursuant to "jump ball provision" of the Participants Agreement (Section 11.1.5). As requested, comments on the Proposals were due on or before February 12, 2014.

Interventions only were filed by Algonquin Gas Transmission, ConEd, CT AG, CT OCC/DEEP, Essential Power, Exelon, LIPA, New England LDCs, NICC, REPSOL, RI PUC, TransCanada, Vitol, and the following gas transmission companies: Algonquin, Iroquois, Maritimes and Northeast, Tennessee. Comments and protests were filed by NEPOOL and the ISO on each other's Proposals, as well as by Potomac Economics, ANGA, Brookfield, CMEEC, CT PURA, Dominion, EMCOS, EMI, EnerNOC, Entergy, GDF SUEZ, HQUS, IECG, Indicated Generators, Maine OPA, MPUC, MA DPU, Nat'l Grid, NEPGA/EPSA, NESCOE, NE Nat. Gas. Industry, N.E. Efficiency Partnerships, NextERA, NGSA, NRG, NU, PSEG, RENEW, UI, and VT PSB. A summary of the comments was circulated to the Committee on February 17, and as revised on February 19, and is posted on the Litigation Updates & Reports webpage (http://www.nepool.com/Litigation_Reports.php).

Answers to the comments and protests were filed by NEPOOL, the ISO, Connecticut and Rhode Island Parties, Dominion, Entergy, GDF SUEZ, Indicated Generators, Maine OPA and MPUC, and NRG. A summary of those answers was circulated under separate cover to the Committee on March 5, and is posted on the Litigation Updates & Reports webpage. Also on February 27, NEPOOL submitted a Motion for Discovery. The ISO answered the Discovery Motion on March 4, and NEPOOL answered that ISO answer on March 6. Also on March 6, MMWEC submitted comments supporting NEPOOL's Discovery Motion. NEPOOL requested FERC action on its Discovery Motion by March 7, 2014. Since the last Report, the Connecticut and Rhode Island parties filed on March 7 an answer to the ISO's March 3 answer, urging the FERC to reject the entirety of the ISO's late filing and the new expert testimony of R. Mudge. On March 12, AWEA submitted a motion to intervene and comments out of time. On March 18, NEPOOL filed an answer to the ISO's March 3 answer. NextEra also filed, on March 28, an answer to the ISO's March 3 answer. Since the last Report, on April 7, ClearView Energy Partners submitted comments. These matters remain pending before the FERC. Links to all of the documents filed in this proceeding (other than interventions) can be found on the NEPOOL website at <http://nepool.com/ER14-1050.php>.

If you have any questions concerning this matter, please contact Dave Doot (860-275-0102; dt_doot@daypitney.com), Harold Blinderman (860-275-0357; hblinderman@daypitney.com), or Sebastian Lombardi (860-275-0663; slombardi@daypitney.com).

- **Demand Response Baseline Changes (ER14-727)**

As previously reported, the FERC conditionally accepted, effective June 1, 2014, revisions to Market Rule 1 and Appendix E1 (the "DR Baseline Changes") to improve baseline accuracy by accounting for scheduled and forced curtailments of Real-Time Demand Response Assets and Real-Time Emergency Generation Assets

(typically industrial or commercial facilities).³⁰ As previously reported, the DR Baseline Changes address the potential distortion of baselines due to scheduled or forced curtailments by requiring demand response (“DR”) providers to submit meter data values during a curtailment that are equal to the last unadjusted baseline computed prior to the curtailment instead of actual meter readings. The DR Baseline Changes also provide that a DR provider may not submit a Demand Reduction Offer during a scheduled or forced curtailment since the affected assets are not actually available to be dispatched in order to balance Real-Time supply and demand. In accepting the DR Baseline Changes, the FERC found that the Changes improve the accuracy of and preserve Demand Response Baselines during periods of forced and scheduled curtailments, provide for a more accurate representation of asset availability for dispatch and appropriate compensation, and the other proposed clarifications just and reasonable.³¹ The FERC conditioned its acceptance of the DR Baseline Changes on (i) further explanation (or Tariff changes) explaining how a Demand Response Asset with a cleared Demand Reduction Offer that experiences an unanticipated forced curtailment during the period in which it was scheduled to reduce load, will receive an energy payment, and (ii) a correction to Market Rule Section 13.7.1.5.10.2(a)(ii).³² The April 1 order was not challenged and is final and unappealable.

In an April 3 memo to the Markets Committee, the ISO indicated that it would not propose any Market Rule changes in response to the April 1 order and provided an explanation as to how the previously proposed Tariff language provides for energy payments to a Demand Response Asset with a cleared Demand Reduction Offer during the period in which it was scheduled to reduce demand on the first day of an unanticipated forced curtailment.³³ The compliance filing directed was submitted by the ISO on May 1. Comments, if any, on the compliance filing are due on or before May 22. If you have any questions concerning this matter, please contact Sebastian Lombardi (860-275-0663; slombardi@daypitney.com).

- **FCM Offer Review Trigger Price Revisions (ER14-616)**

As previously reported, the FERC issued an order, on February 11, 2014, accepting in part, and rejecting in part, changes filed by the ISO to establish new Offer Review Trigger Prices (“ORTP”) for the ninth Forward Capacity Auction (“FCA9”), a revised methodology for calculating an ORTP for Demand Resources other than energy efficiency Demand Resources, and a mechanism for adjusting (by an index or combination of indices) the ORTPs for years when full recalculation of the ORTPs is not performed (collectively, the “ORTP Changes”).³⁴ In accepting the ORTP Changes, the *ORTP Order accepted* nearly all the Tariff revisions proposed by the ISO, including the proposed ORTP for combustion turbines, combined cycle gas turbines, energy efficiency DR, load management DR, and off-shore wind (finding “that ISO-NE has adequately explained its determination that insufficient cost data exists to conduct a full calculation pursuant to section III.A.21.1.2(b) of its Tariff”³⁵); the *ORTP Order rejected* the proposed ORTP for on-shore wind (finding “the assumption that a resource participating in FCA9 for the 2018-2019 Capacity Commitment Period will receive Production Tax Credit revenues to be inappropriate”³⁶) and combined DG/DR (rejecting as unjust and unreasonable with respect to these kinds of resources the ISO proposal to tie the ORTP for a given resource to the ORTP of its underlying generation technology type³⁷). The accepted Tariff revisions became effective February 11, 2014.

³¹ *Id.* at P 5.

³² *Id.* at P 6.

³³ The ISO’s memo is available with the April 8 Markets Committee materials at http://www.iso-ne.com/committees/comm_wkgrps/mrks_comm/mrks/mtrls/2014/apr82014/a_09_iso_memo.pdf.

³⁴ *ISO New England Inc.*, 146 FERC ¶ 61,084 (Feb. 11, 2014) (“*ORTP Order*”).

³⁵ *Id.* at P 39.

³⁶ *Id.* at P 33.

³⁷ *Id.* at PP 47-49.

Request for Rehearing (-002). On March 13, Renewable Parties³⁸ requested rehearing of the *ORTP Order*, asserting that the FERC (i) erred in finding the PTC should not be considered a source of expected non-capacity revenue for new wind resources participating in FCA9 and (ii) erred in assuming that an onshore wind resource participating as a new resource in FCA9 will not qualify for the PTC available for projects starting construction in 2013 or earlier. On April 14, the FERC issued a tolling order affording it additional time to consider Renewable Parties' rehearing request, which remains pending before the FERC.

March 13 Compliance Filing (-001). As directed, the ISO and NEPOOL jointly submitted, on March 13, a revised Section III.A.21.1.1 of Appendix A to Market Rule 1 to strike the ORTP values for on-shore wind resources and Demand Resources comprised of Distributed Generation. The compliance changes were supported by the Participants Committee at the March 7, 2014 meeting (Agenda Item # 9). Comments on this compliance filing were due on or before April 3; none were filed. The compliance filing is pending before the FERC. As noted above, replacement FCA9 ORTPs for on-shore wind and Demand Resources with Distributed Generation were separately proposed in a contemporaneous filing in ER14-1477 and are also pending before the FERC.

If you have any questions concerning this matter, please contact Sebastian Lombardi (860-275-0663; slombardi@daypitney.com).

- **Demand Resource Commercial Operation Auditing Revisions (ER14-581)**

On April 9, the FERC accepted changes jointly filed December 9, 2013 by the ISO and NEPOOL that modified Demand Resource auditing requirements to permit additional audits to be performed throughout the Capacity Commitment Period as new assets are added to the Demand Resource to facilitate the return of additional Financial Assurance, as the demand response provider performs additional audits to demonstrate that additional MW of the resource are commercially operational ("DR Commercial Operation Audit Revisions"). The DR Commercial Operation Audit Revisions also made a number of other ancillary and conforming changes to the audit rules for Demand Resources and to rules that address how the audit values are utilized. The Demand Resource Commercial Operation Auditing Revisions will become effective June 1, 2014. Unless the April 9 order is challenged, this proceeding will be concluded. If you have any questions concerning this matter, please contact Sebastian Lombardi (860-275-0663; slombardi@daypitney.com).

- **Exigent Circumstances Filing – FCM Admin. Pricing Rules (ER14-463)**

Rehearing and clarification has been requested and remains pending on the *Jan 24 Exigent Circumstances Order* in this proceeding. As previously reported, the FERC accepted, on January 24, revisions to the FCM administrative pricing rules that (i) addressed what the ISO identified as a "gap" in the Insufficient Competition rules; (ii) set an administrative rate of \$7.025/kW-month to be applied if there is Insufficient Competition (as the ISO proposed to redefine it) or Inadequate Supply in FCA8; and (iii) made additional clarifying changes to the FCM administrative pricing rules (collectively, the "FCM Pricing Rule Changes").³⁹ The FCM Pricing Rule Changes became effective January 24, 2014, as requested.

In accepting the filing, the FERC established a \$7.025/kW rate, should the administrative pricing provisions trigger, for FCA8, replacing existing Tariff provisions that it found unjust and unreasonable in the Administrative Pricing Rules Complaint order (*see* EL14-7 in Section I above).⁴⁰ Addressing the ISO's statements about a sloped demand curve as a long-term solution to the issues presented in this proceeding, the

³⁸ "Renewable Parties" are Renewable Energy New England, Inc. ("RENEW") First Wind and CLF.

³⁹ *Jan 24 Exigent Circumstances Order*.

⁴⁰ The order also accepted the ISO's proposed changes to correct the IC Gap and the remaining administrative pricing provisions. Addressing the questions concerning the "Exigent Circumstances" underlying the filing, the FERC found that the ISO had satisfied the prescribed criteria for an Exigent Circumstances filing: "ISO-NE justifiably determined that failing to immediately implement a change prior to FCA 8 could affect the short-term competitiveness and efficiency of the markets and, in the long-term, affect system reliability." *Id.* at P 52.

FERC, noting its concerns that waiting until this summer for such a proposal to be filed would not allow sufficient time for implementation by FCA9, the FERC stated

Given ISO-NE's explanation that a sloped demand curve will address the difficult and challenging issues presented here, and based on ISO-NE's statements that its proposal here is intended to be temporary and address concerns for FCA8, we will direct ISO-NE to submit its proposed demand curve by April 1, 2014, to allow sufficient time for implementation prior to FCA9.⁴¹

Demand Curve Changes were filed by April 1 as directed (*see* ER14-1639 above).

Also in response to the *Jan 24 Exigent Circumstances Order*, the ISO and NEPOOL jointly filed, on March 25, a revised Section III.13.2.8.2 to Market Rule 1 to clarify the precedence of the Inadequate Supply rule over the Insufficient Competition rule in the event that both conditions are triggered simultaneously. That change was unanimously supported by the Participants Committee at the March 21 meeting. Comments on the March 25 compliance filing were due on or before April 15, 2014; none were filed. The compliance filing is pending before the FERC.

If you have any questions concerning this matter, please contact Dave Doot (860-275-0102; dt_doot@daypitney.com), Harold Blinderman (860-275-0357; hblinderman@daypitney.com) or Pat Gerity (860-275-0533; pmgerity@daypitney.com).

- **Energy Market Offer Flexibility Changes (ER13-1877)**

As previously reported, the FERC conditionally accepted, on October 3, 2013, energy market enhancements⁴² designed to provide Market Participants greater flexibility in structuring and modifying their Supply Offers in the Day-Ahead and Real-Time Energy Markets (the "Offer Flexibility Changes").⁴³ The Offer Flexibility Changes were accepted effective as of December 1, 2014, as requested. In accepting the Offer Flexibility Changes, the FERC noted a few potential inconsistencies between the ISO's intended application of the proposed revisions, including the lock-out provisions, and the actual proposed Tariff language. Accordingly, the FERC conditioned its acceptance upon the submission of a compliance filing that reconciles the proposed Tariff language with the ISO's statements concerning application, which it has now also accepted.

Compliance Filing. On April 29, the FERC accepted the changes filed in response to the *Offer Flexibility Changes Order*, unpersuaded by NEPGA's protest (regarding the proposed 5pm deadline for updates to hourly Reference Levels for "locked-out" Resources).⁴⁴ Unless the April 29 order is challenged in Federal Court, this matter will be concluded. If you have any questions concerning this matter, please contact Sebastian Lombardi (860-275-0663; slombardi@daypitney.com) or Pat Gerity (860-275-0533; pmgerity@daypitney.com).

⁴¹ *Id.* at P 30.

⁴² Specifically, the changes (1) will permit the cost-related parameters of a Supply Offer or a Demand Bid for a Dispatchable Asset Related Demand ("DARD") to be modified after the initial Reserve Adequacy Analysis ("RAA") process is completed; (2) will permit submission of cost-related parameters of a Supply Offer or a Demand Bid for a DARD that vary by hour; (3) modify self-schedule implementation to reflect the ability to submit hourly Supply Offers and change Supply Offers in Real-Time; (4) permit submission of negative offers as low as negative \$150/MWh for External Transactions and the energy Blocks for a Supply Offer, Demand Bid, Increment Offer and Decrement Bid; (5) reflect conforming changes to Appendix A mitigation rules consistent with these changes; and (6) reflect clarification and clean-up changes.

⁴³ *ISO New England Inc. and New England Power Pool*, 145 FERC ¶ 61,014 (Oct. 3, 2013) ("*Offer Flexibility Changes Order*"). The *Offer Flexibility Changes Order* was not challenged and is final and unappealable.

⁴⁴ *ISO New England Inc. and New England Power Pool*, 147 FERC ¶ 61,073 (Apr. 29, 2014).

- **Winter 2013/2014 Reliability Program (ER13-1851)**

On April 8, the FERC denied rehearing of the 2013/2014 *Winter Reliability Program Order*.⁴⁵ As previously reported, the FERC *conditionally* accepted the Winter Reliability Program on September 16, to be effective September 6, 2013 through February 28, 2014.⁴⁶ The FERC conditioned its acceptance of the Program on the allocation of Program costs to RTLO rather than Regional Network Load, and on the removal of the specific dates added to Section III.K.2 in the Emergency Amendments Filing (related to the timing for public comments, and issuance of a FERC order, on the Bid Results filing).⁴⁷ In directing the change in cost allocation, the FERC found that that costs of the Program should be allocated to RTLO “[b]ecause real-time load is the primary beneficiary, and the primary cost-driver, of the Winter Reliability Program.”⁴⁸ The FERC found unpersuasive the arguments that it would be more appropriate to allocate Program costs to Regional Network Load.⁴⁹ As for the second condition, while the FERC recognized the urgency of the winter reliability concerns that led to the proposed specific dates, the FERC did not find that the record supported provisions binding it to issue an order by a specific date (or include a comment deadline for a proceeding that is already underway and pending before the FERC (*see* 2013/2014 Winter Reliability Program Bid Results Filing (ER13-2266) in Section II above). The allocation and other Tariff changes were reflected in an October 15 compliance filing that was accepted November 13, 2013. As noted above, rehearing of the 2013/2014 *Winter Reliability Program Order*, requested by EPSA and TransCanada, was denied on April 8, 2014. Unless the April 8 order is challenged in Federal Court, this proceeding will be concluded. If you have any questions concerning these matters, please contact Eric Runge (617-345-4735; ekrunge@daypitney.com) or Sebastian Lombardi (860-275-0663; slombardi@daypitney.com).

- **FCM Redesign Compliance Filing: FCA8 Revisions (ER12-953 et al.)**

As previously reported, the FERC, on February 12, 2013, conditionally accepted in part and rejected in part the revisions to the FCM and FCM-related rules in the Tariff (“FCA8 Revisions”) filed by the ISO and the PTO AC.⁵⁰ The *FCA8 Revisions Order* accepted the following aspects of the FCA8 Revisions as compliant with its prior FCM Orders: the ISO’s offer review trigger prices;⁵¹ unit specific offer review;⁵² the ISO’s proposal to subject a resource to offer floor mitigation until that resource clears in one FCA; imports’ treatment under

⁴⁵ *ISO New England et al.*, 147 FERC ¶ 61,026 (Apr. 8, 2014).

⁴⁶ *ISO New England et al.*, 144 FERC ¶ 61,204 (Sep. 16, 2013) (“2013/2014 Winter Reliability Program Order”), *reh’g denied*, 147 FERC ¶ 61,026 (Apr. 8, 2014).

⁴⁷ The FERC also noted its expectation that the ISO would, as it committed to do in the proceeding, make a separate filing at the end of the Winter Reliability Program to relocate the market monitoring changes contained in Appendix K to elsewhere within Market Rule 1. Those changes to satisfy that commitment are under consideration at the Markets Committee.

⁴⁸ *Id.* at P 70.

⁴⁹ *Id.* at P 71. The filing parties asserted that Program cost allocation to Regional Network Load was more appropriate because (i) the Program is a discrete, out-of-market solution similar to a Gap RFP, and (2) the timing of the Program is such that it would have been difficult for LSEs to anticipate the costs and include them in their contracts. The FERC disagreed that the Program, which specifically addresses generation related concerns (resource performance coupled with the region’s increased dependence on natural gas), is akin to a Gap RFP, which addressed transmission-related concerns. Further, the FERC also found unpersuasive the arguments that the timing of the Program warranted allocation to Regional Network Load (either because an RTLO allocation would impose unavoidable costs on LSEs on short notice or increase risk premiums). Citing the Winter 2005/2006 order, the FERC stated that “LSEs “voluntarily assume Real-Time Load Obligation when entering into bilateral contracts with end-use customers[;]” those “contracts contain inherent risk associated with unforeseeable future costs, and we would expect that risk to be captured in bilateral contracts between LSEs and end-use customers.” (*Id.* at P 76).

⁵⁰ *ISO New England Inc.*, 142 FERC ¶ 61,107 (Feb. 12, 2013) (“FCA8 Revisions Order”).

⁵¹ *FCA8 Revisions Order* at PP 37-38.

⁵² *Id.* at P 53.

MOPR;⁵³ no exemptions to MOPR for new Self-Supplied Resources;⁵⁴ the application of mitigation to *all* new resources offering into the FCM, including renewables that are procured pursuant to state policy initiatives;⁵⁵ \$1.00/kW-month Threshold to trigger IMM review of Dynamic De-List Bids;⁵⁶ and a number of other additional revisions.⁵⁷ The *FCA8 Revisions Order* rejected: the ISO's proposed methodology for reducing the offer floor of an uncleared resource that has already achieved commercial operation at the time of an FCA (directing the ISO to submit a revised proposal that subjects a resource to an offer floor until it has demonstrated that it is needed by the market)⁵⁸; the ISO's request to model only 4 capacity zones for FCA8. Two requests for rehearing of the *FCA8 Revisions Order* were filed on March 15, 2013, one by MMWEC, NHEC, APPA, NEPPA, and NRECA; the other, by EMCOS and Danvers. On April 11, NEPGA filed an answer to the MMWEC *et al.* request. On April 15, the FERC issued a tolling order affording it additional time to consider the rehearing requests, which remain pending before the FERC.

ISO-NE Capacity Zones Proposal (-004). On January 31, 2014, the ISO filed its "Capacity Zones Changes," under which the ISO will annually identify and evaluate all of the boundaries and interface transfer capabilities that could be relevant to FCA Capacity Zone modeling. The proposal includes objective criteria to revise the number and boundaries of Capacity Zones automatically as these relevant conditions change. Zones will automatically be modeled in an FCA if the objective criteria described in the proposal are triggered. The ISO requested an April 1, 2014 effective date. The Capacity Zones Changes were considered but not supported at the January 10 Participants Committee meeting. On February 21, NEPOOL filed comments on the Capacity Zones filing,⁵⁹ and protests were filed by EMCOS, NEPGA, NRG, NU, and PSEG. On March 10, the ISO answered the February 21 protests. On March 25, NRG answered the ISO's March 10 answer. On April 8, the ISO requested that the FERC expedite issuance of its order on the Capacity Zones Proposal. On April 28, the FERC accepted the compliance filing.⁶⁰ Challenges, if any, to the *Capacity Zones Proposal Order* are due on or before May 28, 2014.

If you have any questions concerning these matters, please contact Sebastian Lombardi (860-275-0663; slombardi@daypitney.com), Eric Runge (617-345-4735; ekrunge@daypitney.com) or Dave Doot (860-275-0102; dtdoot@daypitney.com).

IV. OATT Amendments / TOAs / Coordination Agreements

- **Updates to Attachment E (list of Local Networks) (ER14-1746)**

On April 21, the PTO AC and the ISO filed updates to Attachment E of the ISO-NE OATT (Local Networks) to reflect in the list of Local Networks the corporate reorganization by Emera Maine and a correction to the name of Fitchburg Gas and Electric Light Company. A June 21, 2014 effective date was requested. Comments on this filing are due on or before May 12. If you have any comments or concerns, please contact Eric Runge (617-345-4735; ekrunge@daypitney.com).

⁵³ *Id.* at P 70.

⁵⁴ *Id.* at P 80.

⁵⁵ *Id.* at P 97.

⁵⁶ *Id.* at P 126.

⁵⁷ *Id.* at P 127.

⁵⁸ *Id.* at PP 63-64.

⁵⁹ NEPOOL filed a correction to its comments on February 24.

⁶⁰ *ISO New England Inc.*, 147 FERC ¶ 61,071 (Apr. 28, 2014) ("Capacity Zones Proposal Order").

- **Order 784 Compliance Filing (ER14-877)**

As previously reported, the ISO submitted a compliance filing on December 27, 2013, in response to *Order 784*. In its December 27 filing, the ISO explained how the Tariff's deviations from the FERC's *pro forma* Open Access Transmission Tariff ("OATT"), including the Regulation Market Rules, already meet the requirements and policy goals of *Order 784* and therefore meet the FERC's requirements for a showing of provisions that are "consistent with or superior to" the *pro forma* OATT. In addition, the ISO asked for a waiver of the new requirement to post on its OASIS historical one-minute and ten-minute certain Area Control Error ("ACE") data for the most recent calendar year, and to update this posting once per year. Interventions were filed by NEPOOL, Exelon and NU. No comments on this filing were submitted on or before the January 17, 2014 comment date. This matter is pending before the FERC. If you have any comments or concerns, please contact Eric Runge (617-345-4735; ekrunge@daypitney.com).

- **Order 764 Compliance Changes (ER14-375)**

As previously reported, the FERC, on March 20, 2014, accepted in part and rejected in part the revisions filed November 12, 2013 by the ISO, NEPOOL, the PTO AC, CSC, and the Schedule 20A service providers ("SSPs") to comply with the requirements of *Orders 764* and *764-A* (the "*Order 764* Compliance Changes").⁶¹ While the FERC accepted the changes to the LGIA that use "Intermittent Power Resource" and "System Operator" rather than the *pro forma* Tariff terms,⁶² the FERC rejected the proposal to place the details of meteorological and forced outage data reporting requirements in OP-14, rather than in Appendix C of the LGIA (concerned that the could "unilaterally change those reporting requirements without having to make at least some showing that the change is just and reasonable").⁶³ Accordingly, the FERC directed the ISO to submit an additional compliance filing on or before April 21 that places the details of VERs' meteorological and forced outage data reporting requirements found in OP-14 (which it otherwise found satisfies the substantive reporting requirements of *Order 764*) in Appendix C of the LGIA in the Tariff.⁶⁴

On April 21, 2014, the ISO and the PTO AC submitted changes in response to the March 20 order. Those changes revise LGIA Article 8.4 to cross-reference LGIA Appendix C, which contains a new subsection that incorporates the specific meteorological and forced outage data reporting requirements set out in the Wind Operators Guide and the means by which that data is to be supplied to ISO-NE. New LGIA Appendix C.3 specifies the meteorological and forced outage data requirements for an Interconnection Customer with a Small Generating Facility that is an Intermittent Power Resource having wind as the energy resource. Implementation details continue to reside in the Wind Operators Guide. The Transmission Committee unanimously recommended Participants Committee support for the compliance changes at a special April 15 meeting. The changes will be considered as part of the May 2 Consent Agenda (Item No. 4). Comments, if any, on the compliance filing will be due on or before May 12. If you have any comments or concerns, please contact Eric Runge (617-345-4735; ekrunge@daypitney.com).

- **Order 1000 Interregional Compliance Filing (ER13-1960; ER13-1957)**

On July 10, the ISO, NEPOOL and the PTO AC jointly filed revisions to Sections I and II of the ISO Tariff to comply with the interregional coordination and cost allocation requirements of *Orders 1000* and *1000-A* (the "*Order 1000* Interregional Compliance Changes") (ER13-1960). In addition, the ISO, on behalf of itself, NYISO and PJM, filed an Amended and Restated Northeastern ISO/RTO Planning Coordination Protocol ("Amended Protocol") as part of its compliance changes (ER13-1957). The *Order 1000 Interregional Compliance Changes* include (i) revisions to Attachment K to add provisions describing the interregional coordination provisions included in the Amended Protocol, as well as adding other provisions facilitating the consideration of interregional solutions to regional needs; (ii) a new Schedule 15 reflecting the methodology for

⁶¹ *ISO New England Inc. and New England Power Pool Participants Comm.*, 146 FERC ¶ 61,190 (Mar. 20, 2014).

⁶² *Id.* at P 30.

⁶³ *Id.* at P 31.

⁶⁴ *Id.* at P 32.

allocation among ISO-NE and NYISO of the costs of approved interregional transmission projects; (iii) revisions to Schedule 12 describing the regional cost allocation within New England of the costs of approved interregional transmission projects; and (iv) conforming changes to Tariff Section I. The *Order 1000* Interregional Compliance Changes and the Amended Protocol were supported by the Participants Committee at its June 27 Summer Meeting. On August 7, the FERC extended the comment deadline on these filings to and including September 9, 2013. Doc-less motions to intervene were filed by a number of New England parties in both proceedings, including Dominion, Exelon, PPL, PSEG, and NEPOOL (in the Protocol proceeding (in which it was not a filing party)). On August 26, NEPOOL filed comments supporting the Protocol. NEPOOL added that “From a stakeholder perspective, stakeholder input into revisions to the Protocol as it evolves over time would be easier and more likely to be taken into account if it were made part of the individual regional tariffs of each of the Northeast ISOs rather than existing solely as a stand-alone three-party agreement”. On September 9, NESCOE submitted comments generally supporting the filings, but reserving the right to further comment on these filings should the substance of the changes be modified as a result of further FERC (*see* ER13-193 and ER13-196 below) or federal court proceedings. Public Interest Organizations⁶⁵ raised concerns that the Protocol and related amendments “do not meet certain of the transparency and cost allocation aspects of [*Order 1000*]’s minimum requirements.” On September 24, the ISO answered Public Interest Organizations’ and NEPOOL’s comments. These matters remain pending before the FERC. If you have any comments or concerns, please contact Eric Runge (617-345-4735; ekrunge@daypitney.com).

- ***Order 1000 Compliance Filing (ER13-193; ER13-196)***

Rehearing of the FERC’s May 17, 2013 order on the region’s *Order 1000* compliance filing⁶⁶ (described in previous Reports) remains pending. As previously reported, the *Order 1000 Compliance Order* accepted the ISO-NE/PTO compliance filing as partially complying with *Order 1000*, but required changes to the compliance proposal. The primary change was the elimination of the Right of First Refusal (“ROFR”) and the establishment of competitive transmission development for all regional transmission projects (with an exception to the elimination of the ROFR for transmission needed for reliability within three years of the needs assessment determination and subject to certain other limiting criteria). Additionally, the *Order 1000 Compliance Order* required that the public policy transmission proposal be revised to: (i) make the ISO, rather than the New England states, the entity that evaluates and selects which transmission projects will be built to meet transmission needs driven by public policy; and (ii) include an *ex ante* default cost allocation method, transparent to all stakeholders, developed in advance of particular transmission facilities being proposed, rather than leaving it to the states to decide cost allocation on a project-specific basis after particular projects are proposed. While requiring these fundamental changes to the public policy transmission part of the filing, the *Order 1000 Compliance Order* also allowed for the NESCOE-driven proposal for both selection of projects and cost allocation to remain in the tariff as a complementary process for voluntary transmission projects alongside the *Order 1000*-compliant process. A more detailed summary of the *Order 1000 Compliance Order* was circulated to the Participants Committee on May 20, 2013. On June 17, the ISO, LS Power, PTO AC and NESCOE each filed requests for clarification and/or rehearing of the *Order 1000 Compliance Order*. On June 28, the ISO answered LSP Power’s request concerning the effective date for the *Order 1000* compliance changes. On July 16, the FERC issued a tolling order affording it additional time to consider the requests for clarification and/or rehearing, which remain pending before the FERC.

Order 1000 November 15 Compliance Order Changes. On November 15, the ISO and the PTO AC jointly submitted proposed revisions to Sections I and II of the ISO Tariff and to the Transmission Operating Agreement (“TOA”) (the “Compliance Revisions”) to comply with the FERC’s May 17, 2013 *Order 1000 Compliance Order*. The revisions included planning revisions (addressing competitive processes for developing new regional transmission projects), cost allocation revisions (regarding the allocation of costs for Public Policy Transmission Projects), and TOA revisions. The Planning Revisions and the Cost Allocation

⁶⁵ “Public Interest Organizations” are Conservation Law Foundation, Environment Northeast, Natural Resources Defense Council, Pace Energy and Climate Center, and the Sustainable FERC Project.

⁶⁶ *ISO New England Inc.*, 143 FERC ¶ 61,150 (May 17, 2013) (“*Order 1000 Compliance Order*”).

Revisions filed by the ISO and PTO AC were considered but not supported by the Participants Committee at its November 8 meeting.

Comments on the November 15 filing were filed by *NEPOOL* (seeking two sets of changes to the Planning Revisions filed by the ISO and PTO AC (i) limiting the scope of transmission projects that are grandfathered under the old, non-competitive processes, so that Proposed Projects are not grandfathered but instead are open to competition; and (ii) ensuring that all Qualified Transmission Project Sponsors (“QTPS”) are on an equal footing regarding consulting with the ISO in assessing regional transmission needs and solutions (together, the “NEPOOL Alternative”); but taking no position on the Cost Allocation revisions); *CLF and The Sustainable FERC Project* (supporting the November 15 filing and its public policy planning and regional cost allocation provisions.); EMCOS/Participating Municipals (request the ISO and TOs be required to revise Section 3.3 of Attachment K to eliminate the grandfathering for proposed Transmission Projects, and to revise Schedule 12 to ensure that public power systems not subject to state Public Policy requirements are exempted from any obligation to pay for Public Policy projects); *Environmental Groups*⁶⁷ (each supporting the Cost Allocation Revisions, but noting continuing concern that the region’s planning process fails to produce more cost-effective and efficient planning outcomes); *LSP Transmission* (supporting NEPOOL’s Alternative, requesting a January 1, 2014 effective date for the compliance filing, and protesting the hold harmless provision contained in Attachment O, Section 9.01, the ISO’s evaluation process and the proposed study deposit), *MA DPU* (supporting the Cost Allocation Revisions); *NESCOE* (without expressing a position on the Cost Allocation Revisions, affirming its support for NESCOE it having a central role in determining how public policy planning need relates to cost allocation); *New Hampshire Transmission* (“NHT”) (protesting the November 15 filing and suggesting specific amendments to the proposal to be submitted a short time after an order on the second compliance filing is issued); *Public Systems*⁶⁸ (requesting that the FERC adopt MMWEC’s cost allocation proposal and direct the Filing Parties to include an express right of consumer-owned utilities to opt out of the non-regional allocated costs of projects satisfying policy requirements that do not apply to them); and *VT/RI Parties*⁶⁹ (protesting the Cost Allocation Revisions). Answers to the protests and comments were filed on January 15 by the ISO, PTO AC, and MA DPU (to the VT/RI Parties). On February 4, NHT filed an answer to the January 15 answers by the ISO and PTO AC. The ISO answer the NHT February 4 answer on February 18.

These matters are pending before the FERC. If you have any comments or concerns, please contact Eric Runge (617-345-4735; ekrunge@daypitney.com).

V. Financial Assurance/Billing Policy Amendments

- **FAP eTariff Corrections (ER14-1727)**

On April 16, the ISO submitted corrections to the Financial Assurance Policy (“FAP”) to consolidate, effective April 15, 2014, changes accepted in ER14-1311 (FTR Risk Management Policies-Related FAP Changes) and ER14-1448 (Revised Security Agreement). Comments on this filing are due on or before May 7. If you have any questions concerning this matter, please contact Paul Belval (860-275-0381; pnbval@daypitney.com).

⁶⁷ “Environmental Groups” are Environment Northeast, Connecticut Fund for the Environment, Environment Council of Rhode Island, Health Care Without Harm, The Natural Resources Council of Maine, and The Sustainable FERC Project.

⁶⁸ In this proceeding, “Public Systems” are MMWEC and NHEC.

⁶⁹ “VT/RI Parties” are the State of New Hampshire Public Utilities Commission (“NHPUC”), the Rhode Island Public Utilities Commission (“RIPUC”), the Vermont Public Service Board (“VT PSB”), the Vermont Public Service Department (“VPSD”), Vermont Electric Power Company (“VELCO”), and Vermont Transco (“VT Transco”).

- **Revised Security Agreement (ER14-1448)**

On April 7, the FERC conditionally accepted, effective March 7, as requested, revisions to the FAP to revise the current form of Security Agreement to more accurately reflect the financial relationship among the parties to that Agreement (Participant, Black Rock, and the ISO), to clarify the authorization for the ISO to file a financing statement (as described in the Uniform Commercial Code) regarding the security interest granted in the Security Agreement, and to make certain “clean-up” changes. The FERC, noting that the eTariff software records did not reflect the revisions submitted in the marked Tariff record, directed the ISO to file revised Tariff records reflecting the text from the marked Tariff record in the eTariff software. The ISO submitted that compliance filing (in sub-docket -001) on April 9. No comments on that filing were submitted on or before the April 30 comment date and the compliance filing is pending before the FERC. The compliance filing is currently pending before the FERC. If you have any questions concerning this matter, please contact Paul Belval (860-275-0381; pnbelval@daypitney.com).

- **FTR Risk Management Policies-Related FAP Changes (ER14-1311)**

On April 9, the FERC accepted revisions to the FAP to change the annual submission requirements for risk management policies, procedures, and controls by certain FTR Market participants. Specifically, the changes replace the current annual filing requirement with a requirement either to certify that no changes have been made to the previously submitted policies or to submit the changes. The changes were accepted effective as of April 15, 2014, as requested. Unless the April 9 order is challenged, this proceeding will be concluded. If you have any questions concerning this matter, please contact Paul Belval (860-275-0381; pnbelval@daypitney.com).

VI. Schedule 20/21/22/23 Changes

- **LGIA (Amended) – CMP/Warren (ER14-1473)**

On April 18, the FERC accepted an amended non-conforming LGIA (IA-CMP-12-03) filed by CMP under Schedule 22 of the ISO Tariff governing the interconnection of the 108.5 MW facility of S.D. Warren Company, d/b/a Sappi Fine Paper North America (“Warren”) in Somerset, Maine. CMP reported that the amended LGIA reflects an agreed-upon replacement Voltage Schedule and an increase in the term of the agreement from three to 20 years. The amended LGIA was accepted effective as of March 13, 2014, as requested. Unless the April 18 order is challenged, this proceeding will be concluded. If there are questions on this matter, please contact Pat Gerity (860-275-0533; pmgerity@daypitney.com).

- **Schedule 21-NEP: NEP/Ware Cogen IA Cancellation (ER14-1387)**

On April 7, the FERC accepted a notice of cancellation of New England Power’s (“NEP”) IA with Ware Cogen LP (“Ware Cogen”), effective April 30, 2014. NEP stated that the IA was no longer needed because of the ISO’s December 20 granting of Ware Cogen’s Non-Price Retirement for its generating facility. Unless the April 7 order is challenged, this proceeding will be concluded. If there are questions on this matter, please contact Pat Gerity (860-275-0533; pmgerity@daypitney.com).

- **Schedule 21-GMP: Merger Revisions; Cancellation of Schedule 21-CVPS (ER12-2304)**

As previously reported, the FERC accepted on September 24, 2012, the revised schedules and notices of cancellation filed by Green Mountain Power (“GMP”) in this proceeding, but suspended the provisions, subject to refund, and established hearing and settlement judge procedures.⁷⁰ In its September 24 order, the FERC stated that its “preliminary analysis indicates that Applicants’ proposed Schedules 21-GMP and 20A-GMP and notices of cancellation have not been shown to be just and reasonable, and ... raise issues of material fact that cannot be resolved based on the record before us and are more appropriately addressed in the hearing and settlement judge

⁷⁰ *ISO New England, Inc., Central Vt. Pub. Srv. Corp. and Green Mountain Power Corp.*, 140 FERC ¶ 61,239 (Sep. 24, 2012) (“*GMP Merger Order*”), *reh’g denied*, 142 FERC ¶ 61,146 (Feb. 25, 2013).

procedures we order.”⁷¹ Requests for clarification and/or rehearing of the *GMP Merger Order* requested by VEC and WEC (“Cooperatives”)⁷² were denied on February 25, 2013.⁷³ Also on February 25, the FERC accepted GMP’s October 31, 2012 compliance filing, rejecting Cooperatives’ arguments protesting the compliance filing as beyond the scope of the compliance filing proceeding.⁷⁴

Judge Karen V. Johnson was designated as the settlement judge, and convened two settlement conferences. After a lengthy period of reported negotiation, Green Mountain Power Corporation (“GMP”) submitted on November 13 a Settlement Agreement and Offer of Settlement (“Settlement”) that reportedly resolves all disputes in these proceedings. Pursuant to a December 2 notice issued by Judge Johnson, the deadline for filing initial comments was December 13, 2013; the deadline for filing reply comments, December 23, 2013. FERC Staff filed comments on December 13 indicating that it did not oppose certification or approval of the settlement. Judge Johnson certified the uncontested settlement to the Commission on March 24, 2014.⁷⁵ Since the last Report, Chief Judge Wagner, on April 4, issued an order terminating settlement judge procedures. This matter remains pending before the FERC. If there are questions on this matter, please contact Pat Gerity (860-275-0533; pmgerity@daypitney.com).

VII. NEPOOL Agreement/Participants Agreement Amendments

No Activity to Report

VIII. Regional Reports

- **LFTR Implementation: 22nd Quarterly Status Report (ER07-476; RM06-08)**

The ISO filed the twenty-second of its Quarterly Status Reports regarding LFTR implementation on April 15. Subject to a number of qualifications, the ISO reported that if the third party clearing design begin vetted in the Participant Processes is supported, the third party clearing design could be implemented during Q4 2015 for the 2016 annual FTR auction, about six months later (mid-2016) for monthly auctions, and during Q4 2017 for an initial auction of LFTRs. The estimated 18-month LFTR implementation process, described in previous reports, would be initiated in 2015, presuming the third party clearing design is accepted and related FAP changes resolved. These status reports are not noticed for public comment and no comments have been filed.

- **Reserve Market Compliance (16th) Semi-Annual Report (ER06-613)**

As directed by the original ASM II Order,⁷⁶ as modified,⁷⁷ the ISO submitted its 16th semi-annual reserve market compliance report on April 1, 2014. In the 16th report, the ISO explained, as in its prior

⁷¹ *Id.* at PP 21-22.

⁷² Cooperatives asserted that the FERC failed to appropriately address the Mobile Sierra claim contained in VEC’s Protest and further explained in WEC’s Answer. WEC separately requested that the FERC correct three statements in the *GMP Merger Order* concerning positions taken by WEC.

⁷³ *ISO New England, Inc., Central Vt. Pub. Srv. Corp. and Green Mountain Power Corp.*, 142 FERC ¶ 61,146 (2013).

⁷⁴ *Green Mountain Power Corp.*, 142 FERC ¶ 61,147 (Feb. 25, 2013). The FERC noted that Cooperatives’ raised the same issues in their joint request for rehearing of the *GMP Merger Order*, submitted in Docket No. ER12-2304-001, and their arguments will be addressed in that proceeding. *Id.* at n. 7.

⁷⁵ *ISO New England, Inc., Central Vt. Pub. Srv. Corp. and Green Mountain Power Corp.*, 146 FERC ¶ 63,025 (Mar. 24, 2014).

⁷⁶ *See NEPOOL and ISO New England Inc.*, 115 FERC ¶ 61,175 (2006) (“ASM II Order”) (directing the ISO to provide updates on the implementation of a forward TMSR market), *reh’g denied* 117 FERC ¶ 61,106 (2006).

compliance reports, that due to its efforts on other priority projects (e.g. Order Nos. 745 and 755-related efforts, and CTS implementation), work on the forward TMSR market issues continues to be on hold. The ISO reports that it does not expect to have the available resources needed to revisit this issue until at least 2015. As per the May 9, 2011 letter order in this proceeding, the FERC no longer issues public notices, acts on, or issues orders on these informational filings. If there are questions on this matter, please contact Dave Doot (860-275-0102; dttdoot@daypitney.com).

- **ISO-NE FERC Form 582 (not docketed)**

On April 17, the ISO submitted a report of its total MWh of transmission service during 2013. These filings are not noticed for filing.

IX. Membership Filings

- **May 2014 Membership Filing (ER14-1834)**

On May 1, NEPOOL requested that the FERC accept: (i) the memberships of Tyngsboro Spindle [Related Person to Beacon Power LLC (AR Sector)]; (ii) the termination of Comverge and the Hardwood Companies (each effective May 1, 2014); and (iii) the name change of Boston Energy Trading and Marketing LLC (f/k/a Edison Mission Marketing & Trading, LLC). Comments on this filing are due on or before May 22.

- **April 2014 Membership Filing (ER14-1638)**

On April 1, NEPOOL requested that the FERC accept the voluntary terminations of Ansonia Generation (Generation Group Seat, March 1, 2014), Concord Steam (Generation Group Seat, March 1, 2014), OBE Electric (Supplier Sector, April 1, 2014), and ResCom Energy (Supplier Sector, April 1, 2014). NEPOOL also requested that the FERC accept the involuntary termination of People's Power & Gas (Supplier Sector, Apr 1, 2014). This filing is pending before the FERC.

- **March 2014 Membership Filing (ER14-1399)**

On April 4, the FERC accepted: (i) the memberships of Enerwise Global Technologies [Related Person to Comverge (AR Sector)]; and Pacific Summit Energy (Supplier Sector); (ii) the involuntary termination of A123 Systems Inc. (Mar 1, 2014); and (iii) the name changes of Kendall Green Energy LLC (f/k/a NRG Kendall LLC) and Liberty Utilities (Granite State Electric) Corp. (f/k/a Granite State Electric Company).

X. Misc. - ERO Rules, Filings; Reliability Standards

Questions concerning any of the ERO Reliability Standards or related rule-making proceedings or filings can be directed to Pat Gerity (860-275-0533; pmgerity@daypitney.com).

- **FFT Report: April 2014 (NP14-40)**

NERC submitted on April 30, 2014, its Find, Fix, Track and Report ("FFT") informational filing for the month of March 2014. The February FFT resolves 31 possible violations of 11 Reliability Standards that posed a risk minimal risk to bulk power system ("BPS") reliability, but which have since been remediated.⁷⁸ The 12

⁷⁷ See *NEPOOL and ISO New England Inc.*, 123 FERC ¶ 61,298 (2008) (continuing the semi-annual reporting requirement with respect to the consideration and implementation of a forward market for Ten-Minute Spinning Reserve ("TMSR")).

⁷⁸ Only possible violations that pose a minimal risk to Bulk-Power System reliability are eligible for FFT treatment. See *N. Am. Elec. Reliability Corp.*, 138 FERC ¶ 61,193 (Mar. 15, 2012) at PP 46-56.

Registered Entities involved each submitted a mitigation activities statement of completion. These filings are for information only and will not be noticed for public comment by the FERC.

- **Revised Reliability Standard: PER-005-2 (RD14-7)**

On March 7, 2014, NERC filed for approval changes to PER-005-2 (Operations Personnel Training) (“PER-005 Changes”). The PER-005 Changes are designed to expand training requirements to include local transmission control center operator personnel, Operations Support Personnel and the applicable Generator Operator dispatch personnel. NERC requested that the PER-005 Changes be approved, and the existing PER-005-1 be retired, effective on the first day of the first calendar quarter that is 24 months after the date that the PER-005 Changes are approved by the FERC. NERC suggested that the implementation period is appropriate because the revised Standard will be applicable to functional entities (Transmission Owners and Generator Operators) that are not currently subject to PER-005-1 and those entities will for the first time be required to develop and implement a systematic approach to training process for their applicable personnel. Comments on the PER-005 Changes were filed by all of the RTO/ISOs, on April 11 jointly by all but PJM, and by PJM on April 17. This matter is pending before the FERC.

- **New Reliability Standard(s): Physical Security Measures (RD14-6)**

On March 7, 2014, citing its ongoing oversight of the BPS, and pursuant to section 215(d)(5) of the FPA, the FERC directed NERC to submit for approval, on or before June 5, 2014, one or more Reliability Standards that will require certain registered entities to take steps or demonstrate that they have taken steps to address physical security risks and vulnerabilities related to the reliable operation of the BPS.⁷⁹ The new Standard(s) should require owners or operators of the BPS to identify facilities on the BPS that are critical to the reliable operation of the BPS and then to develop, validate and implement plans to protect against physical attacks that may compromise the operability or recovery of such facilities. The FERC clarified that “[i]n directing NERC to submit these proposed Reliability Standards, we are not proposing specific requirements or otherwise pre-judging what NERC may submit ... The Commission will consider the Reliability Standards that NERC submits for approval in a rulemaking docket, which will include an opportunity for comment.”⁸⁰ Over 40 parties has so far intervened or submitted comments. This matter is pending before the FERC.

- **Revised Reliability Standards: MOD-032-1, MOD-033-1 (RD14-5)**

On May 1, 2014, the FERC approved changes to two Modeling, Data, and Analysis Standards, MOD-032-1 (Data for Power System Modeling and Analysis) and MOD-033-1 (Steady-State and Dynamic System Model Validation), to replace, consolidate and improve upon the “Existing MOD B Standards⁸¹” in addressing system-level modeling data and validation requirements (“MOD Revisions”). As previously reported, NERC stated that the purpose of the proposed Reliability Standards is to establish comprehensive modeling data requirements, reporting procedures, and validation requirements necessary to effectively model the interconnected transmission system for the Near-Term Transmission Planning Horizon and the Long-Term Transmission Planning Horizon. The Proposed Standards were developed to address: (i) directives from *Order Nos. 890 and 693* to modify the Existing MOD B Standards; and (ii) recommendations from a white paper drafted by the NERC Planning Committee’s System Analysis and Modeling Subcommittee (the “SAMS Whitepaper”) proposing improvements to the Existing MOD B Standards. The FERC also approved revised VRFs, VSLs, Implementation Plan, retirements of existing MOD-010-0 and MOD-012-0, and the withdrawal of the MOD B Standards.

⁷⁹ *Reliability Standards for Physical Security Measures*, 146 FERC ¶ 61,166 (Mar. 7, 2014).

⁸⁰ *Id.* at P 13.

⁸¹ Just two of The Existing MOD B Standards, MOD-010-0 and MOD-12-0 were approved in *Order 693*. The other four Existing MOD B Standards were deemed “fill-in-the-blank” standards and were neither approved nor remanded but remain pending. *Mandatory Reliability Standards for the Bulk-Power System*, Order No. 693, 72 FR 16416, FERC Stats. & Regs. ¶ 31,242, at PP 1131-1222, *order on reh’g*, Order No. 693-A, 120 FERC ¶ 61,053 (2007). The February 25 filing requests approval to retire MOD-010-0 and MOD-012-0 and withdraw MOD-011-0, MOD-013-1, MOD-014-0, and MOD-015-0.1.

Changes to the Revised Standards will become effective on the first day of the first calendar quarter that is one year (in the case of MOD-032 R1), two years (in the case of MOD-032 R2, R3, R4), and three years (in the case of MOD-033) after the May 1 approval date. Unless the May 1 order is challenged, this proceeding will be concluded.

- **Revised Reliability Standards: INT-004-3, INT-006-4, INT-009-2, INT-010-2, INT-011-1 (RD14-4)**

On February 27, 2014, NERC filed for approval changes to the following five Interchange and Coordination Standards (“INT Changes”):

- ▶ INT-004-3 – Dynamic Transfers;
- ▶ INT-006-4 – Evaluation of Interchange Transactions;
- ▶ INT-009-2 – Implementation of Interchange;
- ▶ INT-010-2 – Interchange Initiation and Modification for Reliability; and
- ▶ INT-011-1 – Intra-Balancing Authority Transaction Identification.

The INT Changes are designed to consolidate nine currently effective INT Standards into five new Standards⁸² that clarify responsibility for Interchange Authority tasks. In addition, NERC requested approval of associated VRFs and VSLs, a proposed implementation plan, and four new and ten revised definitions⁸³ for inclusion in its *Glossary of Terms* (“Definitions”). NERC requested that the revised INT Standards, VRFs, VSLs, Implementation Plan, and Definitions be approved effective on the first day of the second calendar quarter that is after the date that the proposed INT Standards are approved by the FERC. Comments on the revised Reliability Standards were due on or before March 31, 2014; no comments were filed. Interventions were filed by EEI and EPSA. This matter is pending before the FERC.

- **Revised Definition of Bulk Electric System (RD14-2)**

On March 20, the FERC approved NERC’s revisions to the definition of the term “Bulk Electric System” (“BES Definition”) in the *NERC Glossary of Terms Used in Reliability Standards*.⁸⁴ As previously reported, NERC stated that the proposed revisions add clarity and granularity that will allow for greater transparency and consistency in the identification of Elements and facilities that make up the Bulk Electric System (“BES”) and is responsive to the technical and policy concerns discussed in *Orders 773* and *773-A*. The BES Definition will become effective July 1, 2014, as requested. On April 23, AWEA requested reconsideration of the March 20 order. The AWEA request for reconsideration is pending before the FERC, with FERC action required on or before May 23, 2014, or the AWEA request will be deemed denied.

- **Revised Reliability Standard: PRC-005-3 (RM14-8)**

On February 14, 2014, NERC filed for approval changes to PRC-005-3 (Protection System and Automatic Reclosing Maintenance) (“PRC-005 Changes”). The PRC-005 Changes are designed to include in PRC-005 the maintenance and testing of reclosing relays that can affect the reliable operation of the BPS. NERC requested that the PRC-005 Changes be approved, and the existing PRC-005-2 be retired, effective on the first day of the first calendar quarter that is 12 months after the date that the PRC-005 Changes are approved by the FERC. As of the date of this report, a comment date has not been set for this filing.

⁸² The 5 existing INT Standards to be replaced by INT-011-1 are: INT-001-3 (Interchange Information); INT-003-3 (Interchange Transaction Implementation); INT-005-3 (Interchange Authority Distributes Arranged Interchange); INT-007-1 (Interchange Confirmation); and INT-008-3 (Interchange Authority Distributes Status).

⁸³ The proposed new Definitions are: Attaining Balancing Authority; Native Balancing Authority; Composite Confirmed Interchange; and Reliability Adjustment Arranged Interchange; proposed revised Definitions are: Adjacent Balancing Authority; Arranged Interchange; Confirmed Interchange; Dynamic Interchange Schedule or Dynamic Schedule; Intermediate Balancing Authority; Operational Planning Analysis; Pseudo-Tie; Request for Interchange; Sink Balancing Authority; and Source Balancing Authority.

⁸⁴ *N. Amer. Elec. Rel. Corp.*, 146 FERC ¶ 61,199 (Mar. 20, 2014) (“BES Definition Order”).

- **Revised Reliability Standard: MOD-001-2 (RM14-7)**

On February 10, 2014, NERC filed for approval changes to MOD-001-2 (Modeling, Data, and Analysis — Available Transmission System Capability) (“MOD Changes”). The MOD Changes are designed to replace, consolidate and improve upon the Existing MOD Standards in addressing the reliability issues associated with determinations of Available Transfer Capability (“ATC”) and Available Flowgate Capability (“AFC”). MOD-001-2 is designed to replace the six Existing MOD Standards⁸⁵ to exclusively focus on the reliability aspects of ATC and AFC determinations. NERC requested that the revised MOD Standard be approved, and the Existing MOD Standards be retired, effective on the first day of the first calendar quarter that is 18 months after the date that the proposed Reliability Standard is approved by the FERC. NERC explained that the implementation period is intended to provide NAESB sufficient time to include in its WEQ Standards, prior to MOD-001-2’s effective date, those elements from the Existing MOD Standards, if any, that relate to commercial or business practices and are not included in proposed MOD-001-2. As of the date of this report, a comment date has not been set for this filing.

- **NOPR: Revised Reliability Standards: PRC-023-003 and -025-001 (RM14-3; RM13-19)**

On March 20, the FERC issued a NOPR proposing to approve changes to PRC-023 (Transmission Relay Loadability) and changes to PRC-025 (Generator Relay Loadability) filed by NERC in Docket Nos. RM14-3 and RM13-19.⁸⁶ PRC-025-1 was proposed in response to FERC directives in Order 733⁸⁷ to address generator protective relay loadability. PRC-023-003 was developed to establish a bright-line between the applicability of load-responsive protective relays in the transmission and generator relay loadability Reliability Standards. NERC requested that the revised PRC Standards become effective in accordance with the implementation plans filed with the revised Standards, or the first day of the first calendar quarter following FERC approval of the revised Standards. Comments on the NOPR were due on or before April 28, 2014,⁸⁸ and were filed by NERC, EEI/EPISA, and by three individuals. This matter is pending before the FERC.

- **NOPR: New Reliability Standard: EOP-010-1 (Geomagnetic Disturbance Operations) (RM14-1)**

On January 16, 2014, the FERC issued a NOPR proposing to approve Reliability Standard EOP-010-1 (Geomagnetic Disturbance Operations).⁸⁹ As previously reported, NERC filed the new Reliability Standard to require Bulk-Power System owners and operators to develop and implement operational procedures to mitigate the effects of Geomagnetic Disturbances consistent with the reliable operation of the BPS. Comments on the *GDO NOPR* were due on or before March 24, 2014,⁹⁰ and were filed by over 20 parties, including NERC, the ISO/RTO Council, Dominion, and EEI.

⁸⁵ The 6 existing MOD Standards to be replaced by MOD-001-2 are: MOD-001-1, MOD-004-1, MOD-008-1, MOD-028-2, MOD-029-1a and MOD-030-2.

⁸⁶ *Generator Relay Loadability and Revised Transmission Relay Loadability Reliability Standards*, 146 FERC ¶ 61,189 (Mar. 20, 2014) (“*Loadability NOPR*”).

⁸⁷ *Transmission Relay Loadability Standard*, Order No. 733, 130 FERC ¶ 61,221, at P 104-08 (2010), *order on reh’g and clarification*, Order No. 733-A, 134 FERC ¶ 61,127, *order on reh’g and clarification*, Order No. 733-B, 136 FERC ¶ 61,185 (2011).

⁸⁸ The Loadability NOPR was published in the *Fed. Reg.* on Mar. 27, 2014 (Vol. 79, No. 59) pp. 17,077-17,082.

⁸⁹ *Reliability Standard for Geomagnetic Disturbance Operations*, 146 FERC ¶ 61,015 (Jan. 16, 2014) (“*GDO NOPR*”).

⁹⁰ The *GDO 21 NOPR* was published in the *Fed. Reg.* on Jan. 22, 2014 (Vol. 79, No. 14) pp. 3,547-3,552.

- **NOPR: Revised TOP and IRO Reliability Standards (RM13-15, RM13-14, RM13-12)**

On November 21, 2013, the FERC issued a NOPR⁹¹ proposing (i) to approve NERC's proposed revisions to Reliability Standard TOP-006-3 (Monitoring System Conditions) filed in RM13-12, but (ii) to remand changes to the following Interconnection Reliability Operations and Coordination ("IRO") and Transmission Operating ("TOP") Reliability Standards filed in RM13-14 and RM13-15:

- ▶ IRO-001-3 (Reliability Coordination — Responsibilities and Authorities);
- ▶ IRO-002-3 (Reliability Coordination – Analysis Tools);
- ▶ IRO-005-4 (Reliability Coordination – Current Day Operations);
- ▶ IRO-0014-2 (Coordination Among Reliability Coordinators);
- ▶ TOP-001-2 (Transmission Operations);
- ▶ TOP-002-3 (Operations Planning);
- ▶ TOP-003-2 (Operational Reliability Data); and
- ▶ PRC-001-2 (System Protection Coordination).⁹²

As previously reported, the changes to TOP-006-3 filed April 5, 2013 are targeted to address the respective monitoring role and notification obligation of Reliability Coordinators ("RCs"), Balancing Authorities ("BAs") and Transmission Operators ("TOPs") by clarifying that TOPs are responsible for monitoring and reporting available transmission resources and that BAs are responsible for monitoring and reporting available generation resources. In addition, the changes confirm that RCs, TOPs, and BAs are required to supply their operating personnel with appropriate technical information concerning protective relays located within their respective areas.

The changes to the IRO Standards were to achieve two important overall reliability benefits: (1) delineate a clean division of responsibilities between the Reliability Coordinator and Transmission Operators; and (2) improve system performance by raising the bar on monitoring of Interconnection Reliability Operating Limits ("IROLs") and System Operating Limits ("SOLs") in order to focus monitoring on IROLs and SOLs that are important to reliability.

The changes to the remaining TOP Standards were to upgrade the overall quality of the Standards, eliminate gaps in the requirements, eliminate ambiguity, eliminate redundancies, and address Order 693 directives. NERC indicated in its April filing that the proposed TOP Standards are also more efficient than the currently-enforceable TOP Reliability Standards because they incorporate the necessary requirements from the eight currently-effective TOP Reliability Standards (TOP-001-1a, TOP-002-2.1b, TOP-003-1, TOP-004-2, TOP-005-2a, TOP-006-2, TOP-007-0, TOP-008-1) and the PER-001-0.2 Reliability Standard into three cohesive, comprehensive Reliability Standards that are focused on achieving a specific result.

Because the proposed TOP and IRO Reliability Standards were interrelated, and because the proposed revisions to Reliability Standard TOP-006-3 involved similar issues raised in the TOP and IRO proposals concerning monitoring of the interconnected transmission network and notification of and by registered entities, the FERC addressed all three proposals together in the one NOPR. Although the FERC acknowledged that the proposed TOP and IRO Reliability Standards contain some improvements over the current Standards, concerns

⁹¹ *Monitoring System Conditions - Transmission Operations Reliability Standard, Transmission Operations Reliability Standards and Interconnection Reliability Operations and Coordination Reliability Standards*, 145 FERC ¶ 61,158 (Nov. 21, 2013) ("Nov 21 NOPR").

⁹² The changes in proposed PRC-001-2 were administrative in nature and were limited to removal of three requirements in currently-effective PRC-001-1 that were to be addressed in proposed TOP-003-2.

that the changes would create reliability gaps in the Standards that are critical to reliable operation of the BPS resulted in the proposed remand of the proposed TOP Standards.⁹³ The FERC went on to explain that

given the interrelationship between the TOP and IRO Reliability Standards and that NERC requests that both sets of standards be addressed together, we believe a remand of the proposed IRO standards in addition to those of the TOP will enable NERC to more comprehensively consider modifications to the standards that would address the reliability concerns identified in this NOPR. This approach, in turn, should allow NERC more flexibility in developing appropriate modifications that address our concerns since changes to the TOP standards might require, in some instances, commensurate changes to the IRO standards.⁹⁴

Initially, comments on the *Nov 21 NOPR* were due on or before February 3, 2014.⁹⁵ However, on December 20, NERC requested that the FERC defer action in this proceeding to January 31, 2015 to allow NERC time to consider the reliability concerns raised by the FERC in the *Nov 21 NOPR* and by an independent review commissioned by NERC that identified proposed TOP-001-2, PRC-001-2, IRO-001-3, and IRO-005-4 as high risk standards requiring improvement. On January 6, 2014, the ISO/RTO Council and NRECA filed comments supporting NERC's requested deferral. On January 14, 2014, the FERC granted NERC's motion to defer action on the *Nov 21 NOPR* until January 31, 2015, including deferral of the comment due date. Comments were nonetheless submitted on February 3, 2014 by BPA and Idaho Power. On April 1, 2014, NERC submitted the first of its promised quarterly status reports regarding the status of revisions. In the report, NERC noted that two technical conferences were held by NERC in March, and the Standard Drafting team will meet at least twice in April to work on revisions to the Standards.

- **NOPR: Remand of Interpretation of BAL-002-1a (RM13-6)**

This May 16, 2013 NOPR, which proposes to remand NERC's proposed interpretation of BAL-002 (Disturbance Control Performance Reliability Standard) filed February 12, 2013 (which would prevent Registered Entities from shedding load to avoid possible violations of BAL-002), remains pending.⁹⁶ NERC asserted that the proposed interpretation clarifies that BAL-002-1 is intended to be read as an integrated whole and relies in part on information in the Compliance section of the Reliability Standard. Specifically, the proposed interpretation would clarify that: (1) a Disturbance that exceeds the most severe single Contingency, regardless if it is a simultaneous Contingency or non-simultaneous multiple Contingency, would be a reportable event, but would be excluded from compliance evaluation; (2) a pre-acknowledged Reserve Sharing Group would be treated in the same manner as an individual Balancing Authority; however, in a dynamically allocated Reserve Sharing Group, exclusions are only provided on a Balancing Authority member by member basis; and (3) an excludable Disturbance was an event with a magnitude greater than the magnitude of the most severe single Contingency. The FERC, however, proposes to remand the proposed interpretation because it believes the interpretation changes the requirements of the Reliability Standard, thereby exceeding the permissible scope for interpretations. Comments on the *BAL-002-1a Interpretation Remand NOPR* were due on or before July 8, 2013,⁹⁷ and were filed by NERC, EEI, ISO/RTO Council, MISO, NC Balancing Area, Northwest Power Pool Balancing Authorities, NRECA, and WECC. This NOPR is pending before the FERC.

⁹³ *Id.* at P 4.

⁹⁴ *Id.*

⁹⁵ The *Nov 21 NOPR* was published in the *Fed. Reg.* on Dec. 5, 2013 (Vol. 78, No. 234) pp. 73,112-73,128.

⁹⁶ *Electric Reliability Organization Interpretation of Specific Requirements of the Disturbance Control Performance Standard*, 143 FERC ¶ 61,138 (2013) ("*BAL-002-1a Interpretation Remand NOPR*").

⁹⁷ The *BAL-002-1a Interpretation Remand NOPR* was published in the *Fed. Reg.* on May 23, 2013 (Vol. 78, No. 99) pp. 30,245-30,810.

- **Order 791-A: Version 5 CIP Reliability Standards (-002 through -011) (RM13-5)**

On November 22, 2013, the FERC approved the Version 5 Critical Infrastructure Protection (“CIP”) Reliability Standards submitted by NERC, which adopt new cyber security controls and extend the scope of the systems that are protected by the CIP Standards.⁹⁸ The FERC also approved 19 new or revised definitions associated with the CIP version 5 Standards for inclusion in NERC’s Glossary of Terms. In addition, as it proposed in the prior NOPR, the Commission directed NERC to develop modifications to the CIP version 5 Standards to address concerns that limited aspects of the CIP Version 5 Standards are potentially ambiguous and may raise questions regarding the enforceability of the standards. The FERC also directed NERC to submit informational filings regarding certain issues during and following implementation of the CIP version 5 Standards. *Order 791* became effective February 3, 2014.⁹⁹

Rehearing and/or clarification of *Order 791* was requested on December 20, 2013 by APPA/NRECA, EEI/EPISA, and Utility Services. On March 20, the FERC granted clarification in part and denied rehearing.¹⁰⁰ The FERC clarified (i) that the implementation plan submitted by NERC and approved in *Order 791* requires responsible entities to comply with the High and Medium Impact asset requirements by April 1, 2016; and (ii) that *Order 791* did not direct NERC to conduct an inventory-type survey of all Cyber Assets impacted by the 15-minute parameter (leaving for NERC to determine the scope of the survey); and (iii) that, with respect to the directive concerning the development of Reliability Standards that “require appropriate and reasonable controls to protect the nonprogrammable aspects of communication networks,” *Order 791* does not require the development of controls for third-party communications networks. All other requests for clarification and rehearing were rejected.

On April 29, 2014, the FERC held a staff-led technical conference on CIP issues identified in *Order 791*. Technical Conference panelists were asked to address: (1) whether additional definitions and/or security controls are needed to protect Bulk-Power System communications networks, including remote systems access; (2) the adequacy of the approved CIP version 5 Standards’ protections for Bulk-Power System data being transmitted over data networks; and (3) functional differences between the respective methods utilized for identification, categorization, and specification of appropriate levels of protection for cyber assets using CIP version 5 Standards as compared with those employed within the National Institute of Standards and Technology Security Risk Management Framework. Parties that wish to file post-technical conference comments on the matters discussed may do so on or before May 21, 2014.

- **Rules of Procedure: BES Definition Update (RR14-2)**

On April 1, 2014, NERC requested that the FERC approve an update to the Phase 2 BES definition (“BES Definition”) in the NERC Rules of Procedure to make that definition consistent with that approved in the March 20 *BES Definition Order* (see RD14-2 above). Comments on this filing were due on or before May 1, 2014; none were filed. This matter is pending before the FERC.

- **Market Implications of Frequency Response and Frequency Bias Setting Requirements (AD13-8)**

On July 18, 2013, the FERC solicited comment on the potential market and commercial impacts of certain of the requirements of BAL-003-1 (Frequency Response and Frequency Bias Setting).¹⁰¹ The FERC did not

⁹⁸ *Version 5 Critical Infrastructure Protection Reliability Standards*, Order No. 791, 145 FERC ¶ 61,160 (Nov. 22, 2013) (“*Order 791*”), *clarification granted in part and reh’g denied*, 146 FERC ¶ 61,188 (Mar. 20, 2014).

⁹⁹ *Order 791* was published in the *Fed. Reg.* on Dec. 3, 2013 (Vol. 78, No. 232) pp. 72,756-72, 787. As previously reported, and as requested, the FERC granted an extension of the compliance deadline for the Version 4 CIP Reliability Standards from Apr. 1, 2014 to Oct. 1, 2014. See *Version 4 Critical Infrastructure Protection Reliability Standards and Version 5 Critical Infrastructure Protection Reliability Standards*, 144 FERC ¶ 61,123 (2013).

¹⁰⁰ *Version 5 Critical Infrastructure Protection Reliability Standards*, Order No. 791-A, 146 FERC ¶ 61,188 (Mar. 20, 2014) (“*Order 791-A*”).

¹⁰¹ *Market Implications of Frequency Response and Frequency Bias Setting Reqs.*, 144 FERC ¶ 61,058 (July 18, 2013).

propose changes to proposed Reliability Standard BAL-003-1. Rather, the FERC indicated the comments would inform its consideration and coordination of the requirements of the proposed Standard with tariffs and markets rules subject to its jurisdiction.¹⁰² Comments were due on October 18, 2013. Comments were submitted by NERC, Arizona Public Service, BPA, EEI, EPSA, the Electricity Consumers Resource Council, the Electricity Storage Association (“ESA”), MISO and PJM, and PG&E. This matter is pending before the FERC.

XI. Misc. - of Regional Interest

- **Study Agreement PSNH/Brookfield (ER14-1682)**

On April 8, PSNH filed an executed Study Agreement with Brookfield Power US Asset Management LLC (“Brookfield”) (designated as service agreement SA-1 under PSNH’s eTariff files). The Agreement compensates PSNH for the costs incurred for studying the potential upgrades to the Coos Loop that could increase the Total Transfer Capability of the Coos Loop and thereby increase the likelihood that Brookfield’s Granite Wind Facility will be dispatched pursuant to Market Rule 1. PSNH requested that the Agreement be accepted for filing as of April 8, 2014. Comments on this filing were due on or before April 29, 2014, and none were filed. This matter is pending before the FERC.

- **NGrid Termination of Lowell Cogen IA (ER14-1593)**

On April 23, the FERC accepted the National Grid notice of cancellation of its Interconnection Agreement (“IA”) with Lowell Cogeneration Company. National Grid indicated that the ISO accepted Lowell Cogen’s NPPR for the retired facility on August 20, 2013 and that Lowell Cogen requested, on September 6, 2013, that the IA be terminated. The termination of the IA will be effective May 26, 2014, as requested. Unless the April 23 order is challenged, this proceeding will be concluded. If there are questions on this matter, please contact Pat Gerity (860-275-0533; pmgerity@daypitney.com).

- **HVDC Champlain VT (ER14-966)**

On March 10, the FERC conditionally authorized Champlain VT, LLC, d/b/a TDI New England (“Champlain VT”) to sell transmission rights on its proposed high-voltage direct current (“HVDC”) merchant transmission project, a 150-mile, 1,000 MW, HVDC transmission line, which will originate at a converter station in Quebec, Canada and terminate in Ludlow, Vermont.¹⁰³ Once completed, the transmission line will be operationally controlled by the ISO. The FERC’s order also granted a number of waivers of its regulations granted to other similarly situated entities. If there are questions on this matter, please contact Pat Gerity (860-275-0533; pmgerity@daypitney.com).

- **MISO Methodology to Involuntarily Allocate Costs to Entities Outside Its Control Area (ER11-1844)**

On December 18, 2012, Judge Sterner issued his 374-page initial decision which, following hearings described in previous reports, found at its core that “it is unjust, unreasonable, and unduly discriminatory to allocate costs of Phase Angle Regulating Transformers (“PARs”) of the International Transmission Company (“ITC”) to NYISO and PJM”,¹⁰⁴ which the Midwest ISO (“MISO”) and ITC proposed unilaterally to do (without the support of either PJM or NYISO) in its October 20, 2010 filing initiating this proceeding. For a summary of specific findings, please refer to any of the January to June 2013 Reports.

On January 17, 2013, ITC and MISO challenged the Initial Decision through their Brief on Exceptions. Briefs opposing exceptions were filed by the FERC Trial Staff, MISO TOs, NYISO, NY TOs,

¹⁰² *Id.* at P 2.

¹⁰³ *Champlain VT, LLC*, 146 FERC ¶ 61,167 (Mar. 10, 2014)

¹⁰⁴ *Midwest Indep. Trans. Sys.Op., Inc.*, 141 FERC ¶ 63,021 (Dec. 18, 2012) (“*MISO Initial Decision*”) at P 923.

PJM, and the PJM TOs. On February 25, Joint Applicants moved to strike a portion of the PJM Brief Opposing Exceptions. On March 12, PJM answered Joint Applicants February 25 motion. Since the last report, MISO (now called “Midcontinent Independent System Operator, Inc.”) moved to lodge a NYISO “Broader Regional Markets Informational Report” filed March 19, 2014 in ER08-1281 and a related January 16, 2014 “Ontario-Michigan Interface PAR Performance Evaluation Report” (“Evaluation Report”) prepared by MISO, IESO and PJM. Oppositions to that motion to lodge were filed by FERC Staff, NYISO, NY TOs, PJM, and PSEG. This matter remains pending before the FERC. If there are any questions on this matter, please contact Eric Runge (617-345-4735; ekrunge@daypitney.com).

- **FERC Enforcement Action: Staff Notices of Alleged Violations (IN__-__)**

Generator. On April 1, 2014, the FERC issued a notice that Staff has preliminarily determined that Indianapolis Power & Light Company (“IPL”) violated section 39.2.5 (c) of the MISO Tariff by failing to update the real-time offer for its Petersburg 2 generating unit to reflect a de-rate of that unit on July 5 and 6, 2012.

Recall that Notices of Alleged Violations (“NoVs”) are issued only after the subject of an enforcement investigation has either responded, or had the opportunity to respond, to a preliminary findings letter detailing Staff’s conclusions regarding the subject’s conduct.¹⁰⁵ NoVs are designed to increase the transparency of Staff’s nonpublic investigations conducted under Part 1b of its regulations. A NoV does not confer a right on third parties to intervene in the investigation or any other right with respect to the investigation.

- **Waiver of Transmission Standards of Conduct: Emera Maine (f/k/a Bangor Hydro) Request (TS11-5)**

Emera Maine’s October 31, 2011 amended waiver request remains pending before the FERC. As previously reported, the FERC denied, without prejudice, Bangor Hydro’s initial request for waiver of the FERC’s Standards of Conduct requirements.¹⁰⁶ Bangor Hydro requested a limited waiver from the FERC’s Standards of Conduct requirements,¹⁰⁷ to the extent necessary, to permit its transmission function personnel to undertake the actions necessary to re-sell into the New England Market energy from the Rollins Project which the MPUC has mandated it purchase but cannot otherwise sell at retail. The FERC stated that it would revisit its determination if Bangor Hydro brought forward information demonstrating that it met the criteria for waiver set forth in section 358.1(c) and summarized in the order (i.e. a demonstration that Bangor Hydro has no access to information concerning the operation of the transmission facilities by the ISO and that it obtains information about such matters only by viewing the ISO’s OASIS). In response to the *BHE Standards of Conduct Order*, Bangor Hydro amended its waiver request in 2 respects: First, Bangor Hydro revised its request to apply only to the energy required to be purchased from the Rollins Project and the Exeter Agri-Energy Project. Second, Bangor Hydro committed, as a condition of the waiver (if granted), not to engage in any purchases or sales of wholesale electric capacity or energy except for those required under Maine laws and/or regulations or orders of the MPUC. The MPUC filed comments supporting Bangor Hydro’s amended waiver request on November 15, 2011. This matter remains pending before the FERC.

- **Termination of Fitchburg Mandatory PURPA QF Purchase Obligation from Pinetree QF (QM14-1)**

On March 14, the FERC granted the request by Fitchburg Gas and Electric Light Company (“Fitchburg”) to terminate its mandatory purchase obligation with respect to the output of the 16 MW Qualifying Facility (“QF”) owned and operated by Pinetree Power Fitchburg, Inc. in Westminster, MA (“Pinetree QF”). In granting the request, the FERC found that Fitchburg had rebutted the presumption that Pinetree lacks nondiscriminatory access to the New England Markets. Unless the Pinetree Order is challenged, with any challenges due on or before April 14, this proceeding will be concluded. If there are questions on this matter, please contact Pat Gerity (860-275-0533; pmgerity@daypitney.com).

¹⁰⁵ See *Enforcement of Statutes, Regulations, and Orders*, 129 FERC ¶ 61,247 (Dec. 17, 2009), *order on requests for reh’g and clarification*, 134 FERC ¶ 61,054 (Jan. 24, 2011).

XII. Misc. - Administrative & Rulemaking Proceedings

- **Reliability Technical Conference (AD14-9)**

On April 16, 2014, the FERC announced that it will hold, on June 10, 2014, a Commissioner-led technical conference (that will also be webcast) to discuss policy issues related to the reliability of the Bulk-Power System. A more formal agenda will be issued at a later date.

- **RTO/ISO Winter 2013-2014 Op and Market Performance (AD14-8)**

On April 1, 2014, the FERC held a technical conference to explore the impacts of and actions taken to respond to recent cold weather events by RTO/ISOs. Discussion focused on: the impact of cold weather events on operational planning and real-time operations, market prices and performance, and regional infrastructure; the actions taken in response to those impacts; gas procurement; and lessons learned that can be shared between regions and applied in future events. ISO-NE's materials were circulated to the Committee on April 1, and are posted with the composite materials for the April 4 meeting. Speaker materials are posted in the FERC's eLibrary as well as at:

<http://www.ferc.gov/EventCalendar/EventDetails.aspx?ID=7272&CalType=&CalendarID=116&Date=&View=Listview>. Post-conference comments may be filed on or before May 15, 2014. For those that may have missed the conference, a free recording of the conference will be archived at <http://ferc.capitolconnection.org/> for at least three months.

- **Third-Party Provision of Reactive Supply and Voltage Control and Regulation and Frequency Response Services (AD14-7)**

On April 22, 2014, the FERC held a workshop to obtain input on third-party provision of reactive supply and voltage control and regulation and frequency response services. Discussion focused on: whether reactive supply and frequency response should be considered obligations without payment or services provided for payment, and on market power screening concerns associated with reactive supply, regulation, and frequency response services. Also on April 22, FERC Staff issued a "Report re Payment for Reactive Power".

- **Zero Rate Reactive Power Rate Schedules (AD14-1)**

On December 11, FERC staff led a workshop that explored the mechanics of filing reactive power rate schedules for which there is no compensation. The workshop was held pursuant to a FERC directive in *Chehalis*.¹⁰⁸ Interested persons were invited to file written comments, on or before January 24, 2014, focused on the mechanics of filing reactive power rate schedules for which there is no compensation. Seven sets of comments were filed, including comments by AMP, AWEA/EEI, DTE, EPSA, and NRG.

- **RTO/ISO Centralized Capacity Markets (AD13-7)**

On September 25, 2013, the FERC held a technical conference on centralized capacity markets. The purpose of the technical conference was to consider how current capacity market rules and structures are supporting the procurement and retention of resources necessary to meet future reliability and operational needs. The technical conference provided an opportunity to review the market rules and structures at a high level and examine how they are accomplishing their intended goals and objectives. The technical conference focused on the goals and objectives of existing centralized capacity markets (e.g., resource adequacy, long-term price signals, fixed-cost recovery, etc.) and examined how specific design elements are accomplishing existing and emerging goals and objectives. Comments and presentations have been posted in eLibrary under Docket No. ER13-7. On October 25, the FERC issued a notice inviting post-tech conference comments on any or all of questions attached to the Notice regarding capacity markets in the three Northeast Control Areas. Comments were due on or before January 8, 2014 and were filed by over 50 parties, including the following New England parties: Brookfield, CMEEC, CPV, EMCOS, Entergy, Exelon, GDF SUEZ, Green Mountain

¹⁰⁸ See *Chehalis Power Generating, L.P.*, 145 FERC ¶ 61,052 (Oct. 17, 2013) ("*Chehalis*").

Power, LIPA, MMWEC, NEPGA, Potomac Economics, PSEG, UCS, Viridity, Vitol, VT DPS. Since the last report, comments were submitted, on February 10, 2014, by an ad hoc group of “load” parties.¹⁰⁹

- **NOI: Open Access and Priority Rights on Interconnection Facilities (AD12-14; AD11-11)**

As previously reported, the FERC issued a notice of inquiry (“NOI”), on April 19, 2012, seeking comments on whether, and, if so, how, the FERC should revise its current policy concerning priority rights and open access with regard to certain interconnection facilities. The FERC reported that it had, on a case-by-case basis, permitted an owner of interconnection facilities to have priority to capacity over its facilities for its existing use at the time of a third-party request for service. Specifically, in the instance where an owner of interconnection facilities has specific, pre-existing generator expansion plans with milestones for construction of generation facilities and can demonstrate that it has made material progress toward meeting those milestones, the FERC has granted priority rights for the capacity on the interconnection facilities to those future generation projects or expansions as well. Further, an affiliate of the current interconnection facility owner that is developing its own generator projects also may obtain priority rights to the capacity on the interconnection facilities by meeting the “specific plans and milestones” standard with respect to future use, provided that the plans include a future transfer of ownership of the interconnection facilities to such an affiliate. More than 25 parties filed comments on options for addressing priority rights on interconnection facilities, and this matter remains pending before the FERC.

- **WIRES Request for Policy Statement on ROE for Electric Transmission (RM13-18)**

On June 26, WIRES¹¹⁰ petitioned the FERC to institute an expedited generic proceeding and to provide such policy and clarifications as necessary to provide “greater stability and predictability regarding regulated rates of return on equity for existing and future investments in high voltage electric transmission infrastructure.” Specifically, WIRES recommended a new policy that (1) standardizes selection of proxy groups; (2) denies complainants a hearing on rates of return for existing facilities unless it is shown that existing returns are at the extremes of the zone of reasonableness; (3) allows consideration of competing infrastructure investments of other industries; (4) permits use of other rate of return methodologies; and (5) supports use of more forward-looking data and modeling. In addition, WIRES urged the FERC to support consideration of a project’s actual and anticipated benefits when a complaint is filed against the ROE for an existing project. Although the WIRES petition has not been noticed for public comments, more than 16 sets of comments have been filed. Since the last report, WIRES submitted on October 3 a summary of the comments and analysis filed to that point in the proceeding. On October 16, the Organization of PJM States noted its position that the WIRES petition did not present a compelling reason for the FERC to initiate a generic rulemaking proceeding or abandon its Discounted Cash Flow methodology. On November 5, a letter from US Senator Angus King, urging the FERC to establish a more certain regulatory environment that provide investors the level of confidence necessary to support and encourage needed infrastructure investments, was posted in eLibrary. This matter is pending before the FERC.

- **Order 792: Revisions to Pro Forma SGIA and SGIP (RM13-2)**

On November 22, 2013, the FERC amended its *pro forma* Small Generator Interconnection Procedures (“SGIP”) and *pro forma* Small Generator Interconnection Agreement (“SGIA”), originally set forth in Order 2006, to: (1) incorporate provisions that would provide an Interconnection Customer with the option of requesting from the Transmission Provider a pre-application report providing existing information about system conditions at

¹⁰⁹ The “load” parties were an ad hoc group of publicly and cooperatively owned electric utilities, national consumer and low-income organizations, state public utility commissions, state consumer advocates, investor-owned utilities, industrial customers, and independent power producers, including, among others, APPA, CT AG, CPV, CT DEEP, CT PURA, GMP, and the Northeast Public Power Assoc.

¹¹⁰ WIRES, the **W**orking group for **I**nvestment in **R**eliable and Economic **E**lectric **S**ystems, describes itself as a national non-profit association of investor-, member-, and publicly-owned entities dedicated to promoting investment in a strong, well-planned, and environmentally beneficial high voltage electric transmission grid. Information about its principles and members is available on its website www.wiresgroup.com.

a possible Point of Interconnection; (2) revise the 2 MW threshold for participation in the Fast Track Process included in section 2 of the pro forma SGIP; (3) revise the customer options meeting and the supplemental review following failure of the Fast Track screens so that the supplemental review is performed at the discretion of the Interconnection Customer and includes minimum load and other screens to determine if a Small Generating Facility may be interconnected safely and reliably; (4) revise the *pro forma* SGIP Facilities Study Agreement to allow the Interconnection Customer the opportunity to provide written comments to the Transmission Provider on the upgrades required for interconnection; (5) revise the *pro forma* SGIP and the *pro forma* SGIA to specifically include energy storage devices; and (6) clarify certain sections of the *pro forma* SGIP and the *pro forma* SGIA.¹¹¹ *Order 792* will become effective February 3, 2014.¹¹²

On March 20, the FERC issued *Order 792-A*¹¹³ clarifying the compliance procedures in response to *Order 792*:

Compliance Filing. Each Transmission Provider must file in compliance with *Order 792* the *pro forma* language included in *Order 792* **without variation**.¹¹⁴ This compliance filing made pursuant to FPA Section 206 is required to be filed on or before August 4, 2014.

Variation 205 Filing. A Transmission Provider may submit an FPA section 205 filing to demonstrate that either a variation that has not been previously approved, or a previously-approved variation from the *pro forma* language that has been substantively affected by the reforms adopted in *Order 792*, meets one of the standards for variance provided for in the Final Rule, including independent entity variations, regional reliability variations, and variations that are “consistent with or superior to” the Final Rule. Such filings are also due on or before August 4, 2014.

As previously reported, the ISO and PTO AC notified the FERC that their 6-month (August 4, 2014) compliance filing will contain independent entity variations necessary to preserve previously approved variations and accommodate specific regional needs or differences.

- **Revisions to EQR Filing Process (RM12-3)**

On February 28, the FERC issued an order establishing the new deadlines for the filings of EQRs for third and fourth quarters of 2013 and the first quarter of 2014. The EQR deadlines had been extended to a date to be determined because the new web-based approach for EQR filing was not yet ready for implementation. It is now. Accordingly, the FERC set the following new filing period deadlines:

- ▶ Q3 2013: April 1, 2014 to April 30, 2014;
- ▶ Q4 2013: May 1, 2014 to May 31, 2014;
- ▶ Q1 2014: June 1, 2014 to June 30, 2014; and
- ▶ Q2 2014: July 1, 2014 to July 30, 2014 (normal filing periods resume).

On March 10, the FERC issued an order updating the EQR Data Dictionary for certain fields in the new system¹¹⁵ and an errata to that order on March 24. The FERC held a technical conference on the revised EQR filing process on March 26.

¹¹¹ *Small Generator Interconnection Agreements and Procedures*, Order No. 792, 145 FERC ¶ 61,159 (Nov. 22, 2013) (“*Order 792*”), *order clarifying compliance procedures*, 146 FERC ¶ 61,214 (Mar. 20, 2014).

¹¹² *Order 792* was published in the *Fed. Reg.* on December 5, 2013 (Vol. 78, No. 234) pp. 73,240-73,354.

¹¹³ *Small Generator Interconnection Agreements and Procedures*, Order No. 792-A, 146 FERC ¶ 61,214 (Mar. 20, 2014) (“*Order 792-A*”).

¹¹⁴ Transmission Providers must either comply with *Order 792* or demonstrate that the FERC has previously approved variations that are not affected in a substantive manner by the reforms to the *pro forma* language

¹¹⁵ *Order Updating Electric Quarterly Report Data Dictionary*, 146 FERC ¶ 61,169 (Mar. 10, 2014).

- **Order 771: Availability of e-Tag Information to FERC Staff (RM11-12)**

Rehearing of portions of *Order 771* has been requested and remains pending. As previously reported, the FERC issued *Order 771* on December 20, 2012.¹¹⁶ *Order 771* granted the FERC access, on a non-public and ongoing basis, to the complete electronic tags (“e-Tags”) used to schedule the transmission of electric power interchange transactions in wholesale markets. *Order 771* requires e-Tag Authors (through their Agent Service) and Balancing Authorities (through their Authority Service) to take steps to ensure FERC access to the e-Tags covered by this Rule by designating the FERC as an addressee on the e-Tags. The FERC stated that the information made available under this Final Rule will bolster its market surveillance and analysis efforts by helping it detect and prevent market manipulation and anti-competitive behavior. In addition, *Order 771* requires e-Tag information be made available to RTO/ISOs and their Market Monitoring Units, upon request to e-Tag Authors and Authority Services, subject to appropriate confidentiality restrictions. *Order 771* became effective February 26, 2013.¹¹⁷ In response to requests for clarification and/or rehearing of *Order 771* filed by EEL/NRECA, Open Access Technology International, Inc., NRECA (separately), and Southern Companies (collectively, the “Rehearing Requests”), the FERC issued, on March 8, 2013, *Order 771-A*.¹¹⁸ *Order 771-A* addressed only those issues that needed to be answered on an expedited basis to allow affected entities to comply with the requirement to ensure FERC access in a timely manner to the e-Tags covered by *Order 771*.¹¹⁹ The FERC noted that it would issue an additional rehearing order, addressing the remaining issues raised on rehearing and clarification, which therefore remain pending before the FERC.

- **Order 764-A: Variable Energy Resources (RM10-11)**

Requests for rehearing and/or clarification of *Order 764-A* remain pending before the FERC. As previously reported, the FERC, in *Order 764-A*,¹²⁰ affirmed its basic *Order 764* determinations,¹²¹ provided clarification, and granted EEI’s request to extend the period for compliance filings. Specifically, *Order 764-A* clarified (i) that the intra-hour scheduling reform adopted in the *Order 764* applies to *all* transmission customers that schedule transmission service under an OATT;¹²² (ii) in the absence of sub-hourly settlement and dispatch, a public utility transmission provider must account for intra-hour imbalances in order to ensure that they are properly factored into the calculation of hourly imbalance charges;¹²³ and (iii) that schedules for firm transmission service will continue to have curtailment priority over schedules for non-firm transmission service.¹²⁴ Remaining requests for clarification and/or rehearing were denied. Requests for clarification and/or rehearing of *Order 764-*

¹¹⁶ *Availability of E-Tag Info. to Comm’n Staff*, Order No. 771, 141 FERC ¶ 61,235 (Dec. 20, 2012) (“*Order 771*”), *order on reh’g and clarification*, 142 FERC ¶ 61,181 (2013).

¹¹⁷ *Order 771* was published in the *Fed. Reg.* on Dec. 28, 2012 (Vol. 77, No. 249) pp. 76,367-76,380.

¹¹⁸ *Availability of E-Tag Info. to Comm’n Staff*, Order No. 771-A, 142 FERC ¶ 61,181 (Mar. 8, 2013) (“*Order 771-A*”).

¹¹⁹ *Order 771-A* clarified that: (1) Balancing Authorities and their Authority Services will have until 60 days after publication of this order to implement the validation requirements of *Order 771*; (2) validation of e-Tags means that the Sink Balancing Authority, through its Authority Service, must reject any e-Tags that do not correctly include the FERC in the CC field; (3) the requirement for the FERC to be included in the CC field on the e-Tags applies only to e-Tags created on or after March 15, 2013; (4) the FERC will deem all e-Tag information made available to the FERC pursuant to *Order 771* as being submitted pursuant to a request for privileged and confidential treatment under 18 CFR 388.112; (5) the FERC is to be afforded access to the Intra-Balancing Authority e-Tags in the same manner as interchange e-Tags; and (6) the requirement on Balancing Authorities to ensure FERC access to e-Tags pertains to the Sink Balancing Authority and no other Balancing Authorities that may be listed on an e-Tag.

¹²⁰ *Integration of Variable Energy Res.*, 141 FERC ¶ 61,232 (Dec. 20, 2012) (“*Order 764-A*”), *reh’g requested*.

¹²¹ *Integration of Variable Energy Res.*, 139 FERC ¶ 61,246 (2012) (“*Order 764*”), *order on reh’g*, 141 FERC ¶ 61,232 (2012), *reh’g requested*.

¹²² *Id.* at P 15.

¹²³ *Id.* at P 19.

¹²⁴ *Id.* at P 23.

A were submitted on January 22, 2013 by Powerex and Iberdrola. On February 19, 2013, the FERC issued a tolling order affording it additional time to consider the Powerex and Iberdrola requests, which remain pending before the FERC. The region's *Order 764/764-A* compliance revisions were considered and supported at the August 2, 2013 meeting. Since the last report, the ISO, NEPOOL, PTO AC, CSC and SSPs jointly filed, on November 12, 2013, New England's compliance changes (*see* Section IV, ER14-375 above). If there are questions on this matter, please contact Eric Runge (617-345-4735; ekrunge@daypitney.com).

- **NOPR: Incorporation of WEQ Version 003 Standards (RM05-5)**

On July 18, the FERC issued a NOPR¹²⁵ which proposes to amend FERC regulations by incorporating by reference *Version 003* of the Standards for Business Practices and Communication Protocols for Public Utilities adopted by the Wholesale Electric Quadrant ("WEQ") of the North American Energy Standards Board ("NAESB"). The Version 003 Standards update earlier versions of these standards previously incorporated by reference into FERC regulations at 18 CFR 38.2. The Version 003 standards include modifications to support Order Nos. 890, 890-A, 890-B and 890-C, including the standards to support Network Integration Transmission Service on an Open Access Same-Time Information System ("OASIS"), Service Across Multiple Transmission Systems ("SAMTS"), standards to support FERC policy regarding rollover rights for redirects on a firm basis, standards that incorporate the functionality for transmission providers to credit redirect requests with the capacity of the parent reservation and standards modifications to support consistency across the OASIS-related standards. The Version 003 Standards also include modifications to the OASIS-related standards that NAESB states support Order Nos. 676, 676-A, 676-E and 717 and add consistency. In addition, there are modifications to the Coordinate Interchange standards to compliment recent updates to e-Tag specifications, modifications to the Gas/Electric Coordination standards to provide consistency between the two markets, and re-organized and revised definitions to create a standard set of terms, definitions and acronyms applicable to all NAESB WEQ standards. The Version 003 Standards include the Standards addressed in *Order 676-G* and the recent Smart Grid Standards. Comments on the WEQ Version 003 Standards NOPR were due on or before September 24, 2013,¹²⁶ and were filed by 11 parties, including APPA, EEL, and the IRC. This matter is pending before the FERC.

XIII. Natural Gas Proceedings

For further information on any of the natural gas proceedings, please contact Joe Fagan (202-218-3901; jfagan@daypitney.com) or Jennifer Galiette (860-275-0338; jgaliette@daypitney.com).

- **Natural Gas and Electric Market Coordination (AD12-12)**

As previously reported, the Gas-Electric Focus Group filed its final report in this docket on March 31, 2014. The submission was not noticed for comment and no further FERC action is expected.

- **NOPR: Coordination of the Scheduling Processes of Interstate Natural Gas Pipelines and Public Utilities (RM14-2)**

On March 20, 2014, the FERC issued a series of orders addressing gas-electric coordination. At the forefront, was this NOPR, in which the FERC proposes to revise its natural gas act regulations in order to better coordinate the scheduling of natural gas and electricity markets and to provide additional flexibility to natural gas shippers.¹²⁷ Specifically, the NOPR proposes to: (i) start the Gas Day earlier, at 4:00 a.m. Central

¹²⁵ *Standards for Bus. Practices and Communication Protocols for Pub. Utils.*, 144 FERC ¶ 61,026 (Jul. 18, 2013) ("WEQ Version 003 Standards NOPR").

¹²⁶ The *WEQ Version 003 Standards NOPR* was published in the *Fed. Reg.* on July 26, 2013 (Vol. 78, No. 144) pp. 45,096-45,104.

¹²⁷ *Coordination of the Scheduling Processes of Interstate Natural Gas Pipelines and Public Utilities*, 146 FERC ¶ 61,201 (Mar. 20, 2014).

Clock Time (“CCT”)¹²⁸ rather than 9:00 a.m., in order to ensure that gas-fired generators are not running short on gas supplies during the morning electric ramp periods; (ii) institute a later start to the first day-ahead gas nomination opportunity (called the Timely Nomination Cycle), from 11:30 a.m. to 1 p.m. The FERC said that because the Timely Nomination Cycle is the most liquid of the gas nomination cycles, this change will allow electric utilities to finalize their scheduling before gas-fired generators must make gas purchase arrangements and submit nomination requests for natural gas transportation service to the pipelines; and (iii) modify the current intraday nomination timeline to provide 4 (rather than 2) intraday nomination cycles in order to provide greater flexibility to all pipeline shippers. The NOPR adds an early morning nomination cycle with a mid-day effective flow time and a new late-afternoon nomination cycle during which firm nominations would have precedence over or be permitted to bump already scheduled interruptible service. Ultimately, the standard cycles will be 8:00 a.m. CCT (bump), 10:30 a.m. CCT (bump), 4:00 p.m. CCT (bump) and 7:00 p.m. CCT (no-bump).

To provide shippers additional flexibility, the NOPR also proposes to: (i) clarify its policy with respect to the “No-Bump” Rule for Pipelines with Enhanced Nomination Services (the ability of a pipeline to permit firm shippers to bump an interruptible shipper’s nomination during any enhanced nomination opportunity proposed by the pipeline (beyond the standard nomination opportunities). The FERC indicated that under the revised intraday nomination timelines proposed here, pipelines offering enhanced nomination services should be permitted to bump interruptible shippers at least until the time when the bumping notice under the newly proposed Intra-Day 3 schedule is provided (in the Commission’s proposal 6:00 p.m. CCT); and (ii) require Multi-Party Transportation Contracts; and (ii) FERC proposes to require all interstate pipelines to offer multi-party service agreements, providing multiple shippers the flexibility to share interstate pipeline capacity to serve complementary needs in an efficient manner.

Noting that the natural gas and electricity industries are best positioned to work out the details of how changes in scheduling practices can most efficiently be made and implemented, consistent with the policies discussed in the NOPR, the FERC provided the industries 6 months to reach consensus on standards, consistent with FERC’s guidance in the NOPR, including any revisions or modifications to the proposals provided herein. Comments are due November 28, 2014¹²⁹ and should include the consensus standards or notifying the FERC of their inability to reach consensus on any revisions to the FERC’s proposals. The FERC also noted its expectation that the electric industry (particularly the ISO/RTOs) would participate in these efforts to help ensure that the resulting consensus reasonably accommodates the interests of both industries.

- **Order 787: Gas/Electric Operational Info Sharing (RM13-17)**

As previously reported, the FERC issued, on November 15, 2013, its final rule revising its regulations to provide explicit authority to interstate natural gas pipelines and public utilities that own, operate, or control facilities used for the transmission of electric energy in interstate commerce to share nonpublic, operational information with each other for the purpose of promoting reliable service or operational planning on either the public utility’s or pipeline’s system.¹³⁰ Recipients of the non-public, operational information will be subject to a No-Conduit Rule that prohibits subsequent disclosure of that information to an affiliate or third party. The approach to the sharing of non-public information proposed by the FERC is intentionally permissive, but the FERC noted that should this voluntary approach prove inadequate to promote reliable service or operational planning on natural gas pipelines and electric transmission systems, it may revisit the need to require certain

¹²⁸ CCT, pursuant to the NAESB WGQ standards, reflects daylight savings changes.

¹²⁹ The NOPR was published in the *Fed. Reg.* on Apr. 1, 2014 (Vol. 79, No. 62) pp. 18,223-18,243.

¹³⁰ *Communication of Operational Information Between Natural Gas Pipelines and Electric Transmission Operators*, Order No. 787, 145 FERC ¶ 61,134 (Nov. 15, 2013) (“Order 787”), *reh’g requested*.

communications or information sharing between transmission operators in the future. *Order 787* became effective December 23, 2013.¹³¹

On December 16, the Natural Gas Supply Association (“NGA”), Process Gas Consumers Group, and the Northwest Industrial Gas Users, as well as Enable Interstate Pipelines requested clarification and/or rehearing of *Order 787*. On January 13, the FERC issued a tolling order affording it additional time to consider the rehearing requests, which remain pending before the FERC. Changes to the ISO New England Information Policy that allow the ISO, consistent with *Order 787*, to share Confidential Information with interstate natural gas pipelines are pending before the FERC, but were implemented on January 11, 2014.

- **NOI: Enhanced Natural Gas Market Transparency (RM13-1)**

Comments on the FERC’s November 15, 2012 NOI seeking input on what changes, if any, should be made to the regulations under the natural gas market transparency provisions of section 23 of the Natural Gas Act (“NGA”) are pending before the FERC. As previously reported, the FERC is considering the extent to which quarterly reporting of every jurisdictional natural gas transaction that entails physical delivery for the next day (i.e., next day gas) or for the next month (i.e., next month gas) would provide useful information for improving natural gas market transparency. Comments were received from over 40 parties.

- **Posting of Offers to Purchase Capacity (Section 5 Proceeding) (RP14-442)**

Similar to the ISO/RTO 206 Order in EL14-22 et al. (*see* Section I above), the FERC also instituted a proceeding under Section 5 of the Natural Gas Act to examine whether interstate natural gas pipelines are providing notice of offers to purchase released pipeline capacity in accordance with section 284.8(d) of the Commission’s regulations.¹³² On or before May 19, natural gas pipelines must either revise their respective tariffs to provide for the posting of offers to purchase released capacity, or otherwise demonstrate that they are in full compliance with FERC regulations.¹³³ The FERC also requested that NAESB develop business practice and communication standards specifying: (1) the information required for requests to acquire capacity; (2) the methods by which such information is to be exchanged; and (3) the location of the information on a pipeline’s website. Each pipeline must explain in its compliance filing how it will fully comply with 18 CFR § 284.8(d) until NAESB develops, and the FERC implements, the requested standards, including how the pipeline will provide shippers the ability to post offers to purchase capacity on the Informational Posting section of its website.¹³⁴

- **Natural Gas-Related Enforcement Actions**

The FERC continues to closely monitor and enforce compliance with regulations governing open access transportation on interstate natural gas pipelines. There was no activity since the last Report

XV. Federal Courts

The following are matters of interest, including petitions for review of FERC decisions in NEPOOL-related proceedings, that are currently pending before the federal courts (unless otherwise noted, the cases are before the U.S. Court of Appeals for the District of Columbia Circuit). An “**” following the Case No. indicates that NEPOOL has intervened or is a litigant in the appeal. The remaining matters are appeals as to which NEPOOL has no organizational interest but that may be of interest to Participants. For further information on any of these proceedings, please contact Pat Gerity (860-275-0533; pmgerity@daypitney.com).

- **Orders 773 and 773-A (2nd Cir., 13-2316)**
Underlying FERC Proceedings: RM12-6 and RM12-7¹³⁵
Appellants: NY PSC and People of the State of New York

The NY PSC and the People of the State of New York have petitioned the Second Circuit Court of Appeals for review of FERC’s orders on *Orders 773 and 773-A* (Revised “Bulk Electric System” Definition and Procedures). The brief of the NY PSC/State of NY is now due to be filed no later than May 5, 2014; NARUC’s brief/joint appendix, May 28, 2014.

- **New England’s Order 745 Compliance Filing (12-1306)**
Underlying FERC Proceedings: ER11-4336¹³⁶
Appellants: EPSA and NEPGA

On July 16, 2012, EPSA and NEPGA filed a petition for review of FERC’s orders on New England’s *Order 745* (Demand Response Compensation) filings. On August 16, 2012, EPSA and NEPGA filed a statement of issues as well as an unopposed motion to hold case in abeyance pending the final resolution of Case Nos. 11-1486, et al. (*EPSA et al. v. FERC*) (see *Orders 745 and 745-A* below). On August 23, 2012, the Court granted the motion to hold the case in abeyance. Motions to govern future proceedings will be due 30 days following the course issuance of mandate in the *Order 745* appeal.

- **Orders 1000 and 1000-A ((12-1232 consolidated with 12-1233, 12-1250, 12-1276, 12-1279, 12-1280, 12-1285, 12-1292, 12-1293, 12-1296, 12-1299, 12-1300, 12-1304, 12-1448, 12-1478, and 7th Cir. 12-2248)**
Underlying FERC Proceedings: RM10-23¹³⁷
Appellants: SC PSA, Coalition for Fair Transmission, PSEG, and Sacramento Municipal Utility District

Petitions for review of FERC’s Order 1000 and 1000-A, as identified in previous reports, remain pending before the DC Circuit in the consolidated proceedings identified above. Petitioners’ briefs were filed on May 28, 2013; Respondent’s brief, September 25, 2013; Intervenor’s in Support of Respondent’s Brief, October 16; and Reply Briefs, November 15. Final Briefs were filed on December 13, 2013. Also on December 13, 2013, an unopposed motion of Petitioners proposing format for oral argument was filed. In that motion, Petitioners proposed to waive oral argument on three of the eight issue-based briefs and contemplated oral argument solely on the issues in the remaining five briefs, divided into five sessions totaling 69 minutes per side. Respondent-Intervenor CLF et al. filed a response to Petitioners’ motion and cross-motion for the allocation of three minutes of additional and separate time from that of the FERC to respond to Petitioners’ and Supporting Intervenor’s arguments on the issue of Transmission Planning and Public Policy. Oral arguments before Justices Rogers, Griffith and Pillard were held on March 20, 2014.

¹³⁵ 141 FERC ¶ 61,236 (2012); 143 FERC ¶ 61,053 (2013).

¹³⁶ 138 FERC ¶ 61,042 (Jan. 19, 2012); 139 FERC ¶ 61,116 (May 17, 2012).

¹³⁷ 136 FERC ¶ 61,051 (Jul. 21, 2011); 139 FERC ¶ 61,132 (May 17, 2012).

- **FCM Re-Design (12-1060 consolidated with 12-1074, 12-1085, and 12-1149) ****
Underlying FERC Proceedings: ER10-787; EL10-57; EL10-50¹³⁸
Appellants: NEPGA, NSTAR, MMWEC/NHEC, VT DPS/VT PSB, NRG

Petitions for review of FERC's orders in the FCM Re-Design proceeding were filed by NEPGA on January 27, 2012; by NSTAR on February 3, 2012; by MMWEC/NHEC on February 10, 2012; by VT DPS/VT PSB on March 1, 2012; and by NRG on March 16, 2012. By orders dated February 7, 2012, February 27, 2012, March 2, and March 22, 2012, the Court consolidated the first four cases, with Case No. 12-1060 remaining the lead Case No. On February 29, 2012, the FERC filed an unopposed motion to hold the NEPGA, NSTAR, MMWEC/NHEC petitions in temporary abeyance pending expiration of the statutory deadline for the filing of petitions for review of the challenged orders. On May 7, 2012, NEPOOL notified the Court of its intent to be aligned as an intervenor in support of NSTAR (12-1074) and MMWEC/NHEC (12-1085), reserving the right to join in an intervenors' brief in support of those petitioners. On October 9, briefs were filed by MMWEC/NHEC, NSTAR, and NEPGA. Supporting petitions were filed on October 23 by NECPUC and PSEG. NEPOOL indicated that it would not join in any intervenor's brief. On January 7, 2013, FERC filed its Respondent Brief. Intervenor for Respondent Briefs were filed on January 22, 2013 by NEPGA and jointly by the CT PURA, HQ US, NICC, NSTAR, and NECPUC. Reply Briefs for Generator Petitioners and Distribution Utility Petitioners were filed on February 5, 2013. Final Briefs were submitted on March 5, 2013. Oral arguments were held on November 19, 2013 before Judges Sentelle, Brown and Griffith. This matter is now pending a decision of that panel.

- **Orders 745 and 745-A (11-1486 consolidated with 11-1489, 12-1088, 12-1091 and 12-1093)**
Underlying FERC Proceedings: RM10-17-000¹³⁹
Appellants: EPSA, CAISO, ODEC, EEI, CA PUC

As previously reported, petitions for review of FERC's Order 745 (Demand Response Compensation) were filed by EPSA on December 23, 2011; by CAISO on December 27, 2011; by Old Dominion Electric Cooperative ("ODEC"); and by EEI and the California Public Utilities Commission ("CA PUC") on February 13, 2012. The DC Circuit consolidated the EPSA and CAISO cases on December 28. By orders dated February 13, 2012 and February 15, 2012, the Court consolidated Case Nos. 12-1088, 12-1091 and 12-1093 with 11-1486. All briefing has been completed. Oral argument in this case was held on September 23, 2013 and this matter is pending before the DC Circuit.

- **PPL EnergyPlus, LLC v. Nazarian (4th Cir., 13-2424)**

The September 30, 2013 decision of the United States District Court for the District of Maryland finding that a Maryland Public Service Commission ("MD PSC") order directing three Maryland distribution utilities to enter into a 'contract for differences' for capacity and energy in the PJM control area (the "Cfd") with a gas-fired merchant generator selected by the MD PSC (the "MD PSC Order") violated the Supremacy Clause of the United States Constitution and cannot be enforced,¹⁴⁰ summarized in previous reports, was appealed to the 4th Circuit Court of Appeals. Opening briefs were due and filed by MD PSC and CPV Maryland, LLC ("CPV") on February 4, 2014. Response Briefs were filed on March 10, 2014; EPSA, PJM Power Providers, and EEI/EPSA filed Amicus Curiae Briefs. Oral argument is set for May 13, 2014.

- **PPL EnergyPlus, LLC v. Hanna (3d Cir., 13-4330)**

The analogous October 11, 2013 decision of the United States District Court for the District of New Jersey declaring unconstitutional (and therefore null and void) New Jersey's Long Term Capacity Agreement

¹³⁸ 131 FERC ¶ 61,065 (Apr. 23, 2010); 132 FERC ¶ 61,122 (Aug. 12, 2010); 135 FERC ¶ 61,029 (Apr. 13, 2011); 138 FERC ¶ 61,027 (Jan. 19, 2012).

¹³⁹ 134 FERC ¶ 61,187 (Mar. 15, 2011); 137 FERC ¶ 61,215 (Dec. 15, 2011).

¹⁴⁰ *PPL EnergyPlus, LLC v. Nazarian*, ___ F.Supp.2d ___ (D. Md. Sep. 30, 2013); 2013 U.S. Dist. LEXIS 140210, 2013 WL 5432346 ("District Court Order").

Pilot Program Act (“LCAPP”),¹⁴¹ also summarized in previous reports, was appealed to the 3rd Circuit Court of Appeals. Amicus Curiae Briefs were filed by EEI/EPISA, PJM Power Providers Group, PA PUC; Reply Briefs by CPV, Hess and NJ BPU. APPA/NRECA and the FERC filed Amicus Curiae Briefs. Oral argument was held on March 27, 2014 and this matter is pending before the Third Circuit.

¹⁴¹ *PPL EnergyPlus, LLC v. Hanna*, __ F.Supp.2d __ (D. NJ. Oct. 11, 2013); 2013 U.S. Dist. LEXIS 147273, (“*NJ Order*”).

INDEX
Status Report of Current Regulatory and Legal Proceedings
as of May 1, 2014

I. Complaints

206 Investigation: Consistency of ISO-NE (DA) Scheduling Practices with Natural Gas Scheduling Practices to be Adopted in Docket RM14-2	(EL14-23)	1
Base ROE Complaint (2011)	(EL11-66)	3
Base ROE Complaint (2012)	(EL13-33)	3
FCM Administrative Pricing Rules Complaint.....	(EL14-7)	2
NESCOE FCM Renewables Exemption Complaint.....	(EL13-34)	2

II. Rate, ICR, FCA, Cost Recovery Filings

2013/2014 Winter Reliability Program Bid Results Filing.....	(ER13-2266)	6
Attachment F Implementation Rule Waiver Request (National Grid).....	(ER14-1686)	5
Base ROE Complaint (2011)	(EL11-66)	3
Base ROE Complaint (2012)	(EL13-33)	3
FCA1 Results Remand Proceeding	(ER08-633)	6
FCA8 Results Filing	(ER14-1409)	4
ISO Securities: Authorization for Future Drawdowns.....	(ES14-31).....	6

III. Market Rule and Information Policy Changes, Interpretations and Waiver Requests

206 Investigation: Consistency of ISO-NE (DA) Scheduling Practices with Natural Gas Scheduling Practices to be Adopted in Docket RM14-2	(EL14-23)	1
Capacity Zones Proposal	(ER12-953-002).....	14
CSO Termination: DCAM.....	(ER14-1336)	9
CSO Termination: NextEra	(ER14-1338)	9
CSO Terminations: Constellation.....	(ER14-1339)	9
CSO Terminations: Hess	(ER14-1337)	9
Demand Curve Changes	(ER14-1639)	7
Demand Resource Commercial Operation Auditing Revisions.....	(ER14-581)	12
Demand Response Baseline Changes	(ER14-727)	10
