

FINAL

A meeting of the NEPOOL Participants Committee was held beginning at 2:15 p.m. on Friday, November 3, 2017, at the Hilton Logan Hotel, at Logan Airport, Boston, Massachusetts, pursuant to notice duly given. The meeting was preceded by separate break-out meetings among modified Sector groups with representatives of the ISO Board, New England State Officials, and FERC staff. A quorum determined in accordance with the Second Restated NEPOOL Agreement was present and acting throughout the meeting. Attachment 1 identifies the members, alternates, and temporary alternates attending the meeting.

Mr. Thomas Kaslow, Chair, presided and Mr. David Doot, Secretary, recorded. Mr. Kaslow welcomed the members, alternates and guests who were present, including the ISO Board members, New England State Officials and FERC representatives that remained following the breakout meetings. He thanked all those present for their participation in those prior discussions, noting that preliminary feedback from the discussions was very positive.

APPROVAL OF OCTOBER 13, 2017 MEETING MINUTES

Mr. Kaslow referred the Committee to the preliminary minutes of the October 13, 2017 meeting, as circulated in advance of the meeting. Following motion duly made and seconded, the preliminary minutes of the October 13 meeting were unanimously approved, without abstention or change.

CONSENT AGENDA

Mr. Kaslow referred the Committee to the Consent Agenda that was circulated in advance of the meeting. Following motion duly made and seconded, the Consent Agenda was unanimously approved without comment, with abstentions noted by CSC and LIPA.

ISO CEO REPORT

Mr. Gordon van Welie, ISO Chief Executive Officer (CEO), referred the Committee to the very brief summary circulated and posted in advance of the meeting of the October 19 ISO Board Markets Committee meeting, the only ISO Board meeting that had occurred since the October 13 Participants Committee meeting. There was no question or comment on that summary.

ISO COO REPORT

Dr. Vamsi Chadalavada, ISO Chief Operating Officer (COO), reviewed highlights from the November COO report, which was circulated in advance of the meeting and posted on the NEPOOL and ISO websites. Focusing on highlights, which he explained reflected data through October 25, 2017, he reported for October that: (i) Energy Market value was \$255 million, down \$20 million from September 2017 and up \$26 million from October 2016; (ii) average natural gas prices were up 44% from September 2017 averages; (iii) average Real-Time Hub LMPs (\$33.90/MWh) were 29% higher than September 2017 LMPs; (iv) average daily (peak hour) Day-Ahead cleared physical Energy, as a percent of forecasted load, was 99.5% in October, up from 98.8% in September 2017; (v) daily Net Commitment Period Compensation (NCPC) for October (based on data through October 24, 2017) totaled \$3.1 million, down \$0.6 million from September 2017 and down \$10.5 million from October 2016. The October 2017 NCPC was comprised of (a) \$2.7 million in first contingency payments, which were up \$126,000 from September, and (b) \$344,000 in second contingency payments, which were down \$703,000 from September. He said the NCPC payments were 1.2% of the total Energy Market value.

In response to a request at the October 13, 2017 meeting, Dr. Chadalavada reported on the ISO's operational expectations for Winter 2017/18, based on weather projections from the National Oceanic and Atmospheric Administration and available outage information. He

referred to slides showing projected warmer than normal winter temperatures, with normal snowfall forecasted, and a weak La Niña forecast. He reported that the peak load forecast for the Winter under normal 50/50 conditions was 21,197 MW, and for extreme 90/10 conditions was 21,895 MW. He reminded the Committee that Winter 2017/18 would be New England's first without Brayton Point, which reduced available resources not powered by natural gas by 1,500-1,600 MW. He noted that the ISO was anticipating a lengthy outage of line 398 between New England and New York (Long Mountain – Pleasant Valley), which he said would reduce total transfer capability from New York by several hundred MWs. He reported also that Winter 2017/18 was the final year of the FERC-approved Winter Reliability Program, and that up to 4,000 MW of gas-fired generation could be unavailable during periods of high gas load due to natural gas pipeline capacity constraints.

Referring to his presentation, Dr. Chadalavada reported on the conditions on October 18 that triggered Master/Local Control Center Procedure No. 2 (Abnormal Conditions Alert). He noted that there was a loss of 700 MW of expected deliveries during the evening peak across the interconnection, a loss of a Western Massachusetts 345 kV transmission line, and a simultaneous loss of two fast start resources during the evening ramp and over the peak hour. These events resulted in tight capacity conditions in New England and interface constraints on the northern ties with New York.

Turning to October 22, he reported that the load forecast and limited tie capability triggered tight capacity conditions. In Real-Time, the load ran over forecast by 220 MW integrated over the peak hour, and close to 400 MW instantaneously. Further, the ties with NYISO and New Brunswick were constrained due to ongoing transmission line and substation work.

Responding to questions, Dr. Chadalavada stated the October 18 loss was on the Phase II interconnection and scheduled deliveries over the peak hours were delayed by several hours across the interface. He stated that both October events highlighted the region's need for ramping capability. He also confirmed that both events would have met the definition of Shortage Event under FCM Performance Incentives, with four five-minute intervals on October 18 and three or four five-minute intervals on October 22.

The Calpine representative expressed appreciation to ISO for its letter of general support to the Department of Environmental Protection concerning greenhouse gas emissions allowance auctions. He questioned the ISO's reported decision to disqualify a certain number of MWs from participating as new in FCA12, noting those MWs would be produced by a power station for which the ISO had already granted a Capacity Supply Obligation (CSO) during a previous auction. He observed that that new MWs appeared to be subject to the very same challenges and circumstances as the MWs from the power station that had already cleared. Dr. Chadalavada acknowledged that there were different standards applicable to qualifying new entry than the standards applicable for disqualifying resources that already have a CSO. The ISO had already indicated that one of its 2018 priorities would be to revisit standards for qualifying and disqualifying MWs as new resources.

HQICC VALUES FOR 2018-19 CCP 3RD ARA, 2019-20 CCP 2ND ARA & 2021-22 CCP 1ST ARA

Ms. Mariah Winkler, Reliability Committee Chair, referred the Committee to materials circulated in advance of the meeting concerning the Hydro-Québec Interconnection Capability Credits (HQICC) Values for the 2018-19 Capacity Commitment Period (CCP) third Annual Reconfiguration Auction (ARA), 2019-20 CCP second ARA, and 2021-22 CCP first ARA. She reported that the Reliability Committee recommended Participants Committee support for the HQICC Values at its October 17 meeting.

The following motion was duly made and seconded:

RESOLVED, that the Participants Committee supports the proposed HQICC Values for the specified ARAs, as recommended by the Reliability Committee and as reflected in the materials distributed to the Participants Committee for its November 3, 2017 meeting, together with such non-substantive changes as may be agreed to after the meeting by the Chair and Vice-Chair of the Reliability Committee.

The CSC representative stated CSC and LIPA would oppose the resolutions being voted on for both the HQICCs and the ICR Values because the calculations failed to take into account the reliability benefits of the Cross-Sound Cable.

The Committee considered and approved the motion on HQICCs, with opposition noted by CSC and LIPA, and abstentions noted by Direct Energy, DTE, Entergy, and Verso.

ICR VALUES FOR 2018-19 CCP 3RD ARA, 2019-20 CCP 2ND ARA & 2021-22 CCP 1ST ARA

Ms. Winkler then referred the Committee to materials circulated in advance of the meeting concerning the proposed ICR-related values for the 2018-19 CCP third ARA, 2019-20 CCP second ARA and 2021-22 CCP first ARA. She reported that the Reliability Committee recommended Participants Committee support for the proposed ARA ICR Values at its October 17 meeting, with four oppositions noted.

The following motion was duly made and seconded:

RESOLVED, that the Participants Committee supports the proposed ICR Values for the specified ARAs, as recommended by the Reliability Committee and as reflected in the materials distributed to the Participants Committee for its November 3, 2017 meeting, together with such non-substantive changes as may be agreed to after the meeting by the Chair and Vice-Chair of the Reliability Committee.

In discussing the motion, a member expressed appreciation to the ISO for reflecting in the ICR Values the new methodology for accounting for solar in the region. Other members expressed concern with the adoption of this new methodology for the same reasons they had opposed the ICR Values for FCA12.

The Committee then considered the motion, which received a 62.10% Vote in favor (Generation Sector – 1.07%; Transmission Sector – 15.2%; Supplier Sector – 1.71%; AR Sector – 9.92%; Publicly Owned Entity Sector – 17.10%; End User Sector – 17.10%; and Provisional Member Group – 0.11%). (See Vote 1 on Attachment 2). Mr. Doot referred to Section 11.4 of the Participants Agreement and explained that the vote on ICR Values was subject to the same 60% voting threshold as Market Rules. Accordingly, the vote on the ICR Values passed.

A member questioned whether the Committee's vote on ICR values in October, which had been reported as failed at the meeting and in the minutes, had actually passed. The Chairman asked that the response be included in a memorandum to members after the meeting, which the Secretary committed to provide.

NEW DYNAMIC DE-LIST BID THRESHOLD FOR FCAs 13-15

Mr. Alex Kuznecow, Markets Committee Chair, referred the Committee to materials circulated in advance of the meeting concerning a Market Rule change to reduce the FCM Dynamic De-List Bid Threshold for FCAs 13, 14 and 15. He explained that the ISO-proposed changes were in response to the Tariff's requirement that the Internal Market Monitor (IMM) recalculate the threshold price no less than once every three years. That recalculation resulted in a proposed reduction in the current threshold value of \$5.50/kW-month down to \$4.30/kW-month. He reported that the Markets Committee discussed these changes over several meetings and, at its October 4, 2017 meeting, a vote to recommend Participants Committee support failed with a 56.81% Vote in favor.

The following motion was duly made and seconded:

RESOLVED, that the Participants Committee supports the revisions to Market Rule 1 to modify the Forward Capacity Market Dynamic De-List Bid Threshold, as proposed by the ISO's Internal Market Monitor and circulated to this Committee in advance of this meeting, together with such non-substantive changes as may be approved by the Chair and Vice-Chair of the Markets Committee.

A generation representative explained generators' opposition to the IMM's calculation. He expressed the view that the marginal price in FCA11 was a better indicator of the likely price of a marginal resource in FCAs going forward than the price used by the IMM in its recalculation.

The Committee considered the motion which passed with a 60.63% Vote in favor (Generation Sector – 0%; Transmission Sector – 15.2%; Supplier Sector – 3.42%; AR Sector – 7.70%; Publicly Owned Entity Sector – 17.10%; End User Sector – 17.1%; and Provisional Member Group – 0.11%). (*See* Vote 2 on Attachment 2).

ANNUAL RECONFIGURATION TRANSACTIONS (ART) PROPOSAL

Mr. Kuznecow then referred the Committee to the materials circulated in advance of the meeting regarding a package of Tariff revisions recommended by the ISO that related to capacity substitution across Capacity Zones. He explained that separate elements of the ISO proposal each were considered by the Markets Committee, Reliability Committee and the Budget & Finance Subcommittee. He reported that the Markets Committee recommended Participants Committee support for ISO's proposed revisions to Market Rule 1 and Section I.2.2 (Definitions), which included changes that would exempt resources smaller than 2 MW from being subject to the "Significant Decreases in Capacity" provisions. He reported also that the Committee considered but did not support a proposal by FirstLight Power Resources (FirstLight) to remove this exemption.

Continuing, Mr. Kuznecow reported that the Reliability Committee also considered conforming changes that were proposed to parts of the ISO-NE Tariff within its purview, and he identified those provisions for the members. He said that the Reliability Committee reviewed those proposed changes and recommended Participants Committee support for those changes.

Finally, Mr. Kuznecow reported that the package of changes also included related revisions to the Financial Assurance Policy. He said that the Budget & Finance Subcommittee considered those changes without questions or objections. He noted that, following the Subcommittee's consideration of the changes, the ISO identified minor additional clarifying modifications that were included in the materials circulated to the Participants Committee.

The following main motions were duly made and seconded as a single package:

RESOLVED, that the Participants Committee supports revisions to Market Rule 1 and Section I.2.2 of the Tariff, as recommended by the Markets Committee at its October 4, 2017 meeting, and circulated to this Committee in advance of this meeting, together with such non-substantive changes as may be approved by the Chair and Vice-Chair of the Markets Committee.

RESOLVED, that the Participants Committee supports revisions to Tariff Sections III.12.2 and I.2.2., as recommended by the Reliability Committee at its October 17, 2017 meeting, and as circulated to this Committee in advance of this meeting, together with such non-substantive changes as may be approved by the Chair and Vice-Chair of the Reliability Committee.

RESOLVED, that the Participants Committee supports revisions to the ISO-NE Financial Assurance Policy, as proposed by the ISO, and as circulated to this Committee in advance of this meeting, together with such non-substantive changes as may be approved by the Chair of the Budget & Finance Subcommittee and the Chief Financial Officer of the ISO.

The FirstLight representative offered a motion to amend the main motions to include the Market Rule revisions discussed at the Markets Committee, so as to remove the small-resource exemption previously identified from Sections III.13.1.2.2.4(2)(i) and III.13.4.2.1.3 of Market Rule 1, as described in materials that were reviewed with the Markets Committee and circulated in advance of the meeting (the FirstLight Amendment). The motion to amend the main motions was duly made and seconded.

The Committee considered the motion to amend the main motions, which did not pass. Support for that motion to amend was registered by Entergy, FirstLight, Jericho Power, and

PSEG, and abstentions were noted by BP, Calpine, CPV, CSC, ConEd, Direct, Dominion, DTE, Dynegy, Emera Energy, Galt, Great River Hydro, LIPA, Mercuria, NextEra, and Verso. All others in attendance opposed the FirstLight Amendment.

The Committee then considered and approved the main motions, with oppositions noted by: FirstLight and Jericho; and abstentions noted by: BP, CPV, CSC, DC Energy, Direct, DTE, Galt, AR Small RG Group, LIPA, Mercuria, Verso, and Vitol.

ENERGY EFFICIENCY RESOURCE FINANCIAL ASSURANCE POLICY CHANGES

Mr. Ken Dell Orto, Budget & Finance Subcommittee Chair, referred the Committee to the materials circulated in advance of the meeting related to proposed changes to the ISO Financial Assurance Policy (FAP) relating to the financial assurance requirements for energy efficiency resources (EE) in the FCM. He explained the proposed changes were to become effective as part of the Pay-for-Performance (PFP) changes on June 1, 2018. He said the changes would remove the requirement that EE post financial assurance for PFP penalties during the months in which they cannot be subject to such penalties (February through May and September through November). He reported that the Subcommittee discussed the proposed changes and there were no objections to them.

The following motion was duly made and seconded:

RESOLVED, that the Participants Committee supports the changes to the ISO Financial Assurance Policy relating to the financial assurance requirements for energy efficiency resources participating in the Forward Capacity Market, as circulated to the Committee and discussed at this meeting, together with such further non-substantive changes as the Chief Financial Officer of ISO New England and the Chairman of the Budget & Finance Subcommittee may approve.

Before voting, a member from the AR Sector expressed appreciation to the ISO and the Subcommittee for the changes, stating they did not go as far as was justified but improved the status quo.

The Committee then considered and unanimously approved the motion.

LITIGATION REPORT

Mr. Doot referred the Committee to the November 2 Litigation Report that had been circulated and posted in advance of the meeting, including a memorandum from NEPOOL Counsel summarizing comments that were filed in response to the proposed Grid Resiliency Pricing Rule issued by the Department of Energy (DOE NOPR). He reported that, based on discussions with NEPOOL Officers, NEPOOL would not file reply comments on November 7, but would consult with the Officers following reply comments to determine whether to summarize or respond to those reply comments.

COMMITTEE REPORTS

Given the lateness of the hour, the only report was from Mr. Kuznecow, who highlighted that the Markets Committee was scheduled to meet on November 8-9 in Westborough, MA to consider and take action on the ISO's Competitive Auctions with Sponsored Policy Resources (CASPR) proposal.

OTHER BUSINESS

Mr. Doot reported that the next Participants Committee meeting was the NEPOOL Annual Meeting on December 8 at the Colonnade Hotel in Boston. He reported that current FERC Chairman, Neil Chatterjee, was planning to be in New England for meetings on December 7 and to speak at the December 8 Annual Meeting.

There being no further business, the meeting adjourned at 3:15 p.m.

Respectfully submitted,

David T. Doot, Secretary
